Wodstock, August 6, 1859. Strofula, or King's Evil, is constitutional disease, a corruption of the blod, by which this fluid becomes vitiated, wek, and poor. Being in the circulation, it perades the whole body, and may burst out inlisease on any part of it. No organ is free fron its attacks, nor is there one which it may no destroy. The scrofulous taint is variously cased by mercurial disease, low living, disorered or unhealthy food, impure air, filth an filthy habits, the depressing vices, and, abve all, by the venereal infection. Whateve be its origin, it is hereditary in the constirtion, descending "from parents to children um the third and fourth generation;" indeed, it ems to be the rod of Him who says, "I

wi visit the iniquities of the fathers upon thir children." is effects commence by deposition from the blod of corrupt or ulcerous matter, which, in thlungs, liver, and internal organs, is termed tuercles; in the glands, swellings; and on theurface, eruptions or sores. This foul corrution, which genders in the blood, depresses thenergies of life, so that scrofulous constitutios not only suffer from scrofulous complats, but they have far less power to withstad the attacks of other diseases; consequatly, vast numbers perish by disorders whh, although not scrofulous in their nature, are till rendered fatal by this taint in the systm. Most of the consumption which decimtes the human family has its origin directly in tis scrofulous contamination; and many destuctive diseases of the liver, kidneys, brain, andindeed, of all the organs, arise from or

are ggravated by the same cause. Ole quarter of all our people are scrofulous; this persons are invaded by this lurking infetion, and their health is undermined by it. Ticleanse it from the system we must renovate th blood by an alterative medicine, and inviorate it by healthy food and exercise. Sch a medicine we supply in

AYER'S

Ompound Extract of Sarsaparilla, th most effectual remedy which the medical sll of our times can devise for this every were prevailing and fatal malady. It is combied from the most active remedials that have ben discovered for the expurgation of this foul disrder from the blood, and the rescue of the syem from its destructive consequences. Hece it should be employed for the cure of no only scrofula, but also those other affectios which arise from it, such as ERUPTIVE an SKIN DISEASES, St. ANTHONY'S FIRE, ROE, OF ERYSIPELAS, PIMPLES, PUSTULES, BLICHES, BLAINS and BOILS, TUMORS, TETTER an Salt RHEUM, SCALD HEAD, RINGWORM, REUMATISM, SYPHILITIC and MERCURIAL DIS-BAIS, DROPSY, DYSPEPSIA, DEBILITY, and, inced. ALL COMPLAINTS ARISING FROM VITIA-TEIOR IMPURE BLOOD. The popular belief in impurity of the blood" is founded in truth, for crofula is a degeneration of the blood. The paicular purpose and virtue of this Sarsaparill is to purify and regenerate this vital fluid, witout which sound health is impossible in comminated constitutions.

Lyer's Cathartic Pills, FORALL THE PURPOSES OF A FAMILY PHYSIO. are) composed that disease within the range of theiaction can rarely withstand or evade them The penetrating properties search, and cleanse, andnyigorate every portion of the human organ-ism correcting its diseased action, and restoring its balthy vitalities. As a consequence of these proprties, the invalid who is bowed down with painr physical debility is astonished to find his heah or energy restored by a remedy at once so simp and inviting. Nt only do they cure the every-day complaints of tery body, but also many formidable and dangrous diseases. The agent below named is plead to furnish gratis my American Almanac, contining certificates of their cures and directions for teir use in the following complaints: Costive-nessHearthurn, Headache arising from disordered Storich, Nausea, Indigestion, Pain in and Morbid Inagon of the Bowels, Flatulency, Loss of Appe-

tite, Jaundice, and other kindred complaints,

arisig from a low state of the body or obstruction

diease. So ide is the field of its usefulness and so numeros are the cases of its cures, that almost every ection of country abounds in persons publicly hown, who have been restored from alarming and cen desperate diseases of the lungs by its use. Vhen once tried, its superiority over every other redicine of its kind is too apparent to escape observtion, and where its virtues are known, the publicao longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonry organs that are incident to our climate. While many inferior remedies thrust upon the commutty have failed and been discarded, this has gaied friends by every trial, conferred benefits on the afflicted they can never forget, and produced ares too numerous and too remarkable to be forgetten.
