His eyes will never get well. Multitudes of men and woman have made their eyes weak for life, by the too free use of eyesight in reading small print and doing fine sewing. In view of these things, it will be well to observe the following rules in the use of the eyes: Avoid all sudden changes between light and dark-

Never read by twilight, or moonlight, or on a very cloudy day,

Never read or sew directly in front of the light, or window, or door.

It is best to have the light fall from above obliquely over the left shoulder. Never sleep so that, on the first awakening, the eyes shail open on the light of a window.

Do not use the eyesight by light so scant that it requires an effort to discriminate. The moment you are instinctively prompted to

rub the eyes, that moment cease using them. If the eyelids are glued together, on waking up. do not forcibly open them; but apply the saliva with the finger-it is the speediest dilutant in the world; then wash your eyes and face in warm water .- Hall's Journal of Health.

WISDOM FOR WINTER .- Never go to bed with cold or damp feet.

In going into a colder air, keep the mouth reso-Jutely closed, that by compelling the air to pass circuitously through the nose and head, it may become warmed before it reaches the lungs, and thus prevent those shocks and sudden chills which frequently end in in pleurisy, pneumonia, and other serious forms of disease.

Never stand still a moment out of doors, especially at street corners after having walked even a short distance.

Never ride near the open window of a vehicle for a single half minute, especially if it has been pre- Gloves, &c., &c. lost, or good health permanently destroyed. Never wear india rubbers in cold, dry weather.

Those who are easily chilled on going out of doors, should have cotton batting attached to the vest or outer garment, so as to protect the space between the shoulder-blades behind, the lungs being attached to the body at that point; a little there is worth five times the amount over the chest in front

Never begin a journey until breakfast is eaten. After speaking, singing or preaching in a warm room in winter, do not leave it for at least ten minutes, and even then close the mouth, put on the as well as in Childrens' Clothing, &c., &c., in the latest and gloves, wrap up the neck, and put on a cloak or overcoat before passing out of the door; the neglect of these has a d many a good and useful man in

THE LONDON WORKHOUSES -The London work houses kept their Christmas day as usual, by giv ing the inmates an extra supply of creature comforts including, of course, the standard national fare of roast beef an plum pudding. A SMART FOX, OR A TOUGH STORY .- In a recent lecture upon his experience in Arctic life, Dr. Rae be able to give satisfaction. said :- " On the journey I saw a very curious in stance of the sagacity of the Arctic fox. Conscious and Repairs neatly executed, at moderate charges. that I was aiming at hin, he tucked his tail under his legs, cocked up his ears, and endeavored to look as like a hare as possible (which is an animal com paratively worthless.) Another fact of this kind occurred to me whilst being detained at a particular place, where our favorite amusement was trapping wild animals. Our mode of doing this was with a spring gun connected with a bait, which when touched, produced the explosion. One instance showed us that a fox, either from observation of a companion's fate, or from hard earned ex perience, had gone up to the gun, bit off the cord connected with the bait, and the danger being averted, went and ate the meat in undisturbed comfort And it is a common occurrence for the fox to make a trench up to the bait, seize the bait, and permit the charge to pass over his head."

PICKLED CORPSES .- It is not generally known that a Cappet, on the Lake of Geneva, the residence of the late Madame de Stael, and her father and mother, the celebrated Monsieur and Madame Necker, the latter are not there buried but are pre zerved in a huge vast of spirits of wine. The curious -and they are not few-rush there to see this most painful as well as disagreeable of sights. It was so much the desire of Monsieur Necker that he and his wife should be pickled in this strange manner. that, fearing his own family might not carry out his wishes, he left a certain sum to be paid yearly to the town for the supply of a certain quantity of spirits of wine for that purpose. The vat is placed in the grounds close to the house, and partially hid by trees which his grandson Monsieur le Buron de Stael, had planted around it .- Court Circular.

Ayer's Sarsaparilla A compound remedy, in which we have labored to preduce the most effectual alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective autidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this

iment on many of the worst cases to be found of the following complaints: -SCROFULA AND SCROFULOUS COMPLAINTS. ERUPTIONS AND ERUPTIVE DISEASES, ULCERS. PIMPLES. BLOTCHES, TUMORS, SALT RHEUM. SCALD HEAD, SYPHILIS AND SYPHILITIC AF-FECTIONS, MERCURIAL DISEASE, DROPSY, NEU-RALGIA OR TIC DOULOUREUX, DEBILITY, DYS-PEPSIA AND INDIGESTION, ERYSIPELAS, ROSE or Sr. ANTHONY'S FIRE, and indeed the whole class of complaints arising from IMPURITY OF THE BLOOD.

compound will do it has been proven by exper-

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous scres, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell ou when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation, of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla,

or any thing else. During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dellar Most of these have been trauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of olleguy which rests upon it.
