St. Andrews Railway.

The Journal of Thursday contains an account two meetings of the shareholders of the New Brun wick and Canada Railway Company, held in London on the 1st and 10th of August. From the Journal we make some extracts of the most important points:

"A meeting of this company was held yesterday in the London Tavern to receive a report from the Committee of Inquiry and Consultation appointed on the 7th ult., Mr. F. Edwards in the chair.

they had thought it right to call the shareholders together 10 days before the adjourned meeting to cial character, and the sooner it could be met the better. The report they had to present to the shareholders must be considered as their first rewith their duty that would require further time own paper. He then read the report of the committee, which stated that it was important that no time should a view to insure the completion of the undertaking. shape of provincial debentures, or else an extension of time should be granted to enable them to complete the line to Richmond corner. The committee £22,000 to £30,000 for the payment of overdue bills. they thought those liabilites had been incurred through want of foresight, or from not having a proper control over the management in the colony. They believed the security the company had to offer was good, particularly when certain points were cleared up; and they thought every effort should be made to complete a work which would be some beneficial to the colony. The committee thought as early as possible, and that a certain amount of money should be raised at the same time to launch the scheme, which they thought would be beneficial to the railway company.

"The Chairman said that they were not in a position to reply to the observations of the committee that day, having only just heard the report read. They would hold a board meeting on Thursday next, and would reply to it as soon as possible. There were some grave charges in the report that Look out for them. required an answer. Mr. Baxter, their solicitor, was not present, being then engaged before a Parliamentary Committee; they would therefore reserve reply to a future day.

"Mr. Coneybeare thought it was not a legal meeting, the 11th of August being the day to which the ordinary meeting was adjourned. They had no hands upon. Italy, too, had its Protestants; but Italy killed them; managed to extinguish Protestantism. Italy put up silently with practical lies of all kinds; and shrugging up its shoulders, preferred going in dilettantism and the fine arts. The Italians, instead of the sacred serusce of fact and performance, did music, painting, and the like; till even that has become impossible for them; and no noble nation, sunk from virtue to vertu, ever offered such a spectacle before.
