The present critical state of European affairs will render these publications unusually interesting during the forthcoming year. They will occupy a middle ground' between the hastily written news-items, crude speculations, and flying rumors of the daily Journal, and the p nderous Tome of the futur. historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look for the only really intelligible and reliable history of curre t events, and as such, in addition to their well established literary, sci-

entific and theological character. we urge them upon the consideration of the reading public.
