Agricultural.

Prepare for the Maple Sugar Crop. In consequence of the war, sugar and molasses have risen in price. If we should depend wholly upon the Southern crop, would come up still higher. It so happens,

and the war continues, the prices however, that there are other sources from which to draw sweets besides the sugar plantations of the "sunny South."

In the western States the Sorghum succeeds very well, and the prairie farmers erected by W. T. It may therefore not be premature to call attention thus early to the subject of a more extended a good Hostler in attendance. manufacture of maple sugar and molasses. During the coming winter, and before it is time to tap the trees, convenient shanties and fixtures might be erected and placed so as to carry on the business to better advantage than is usually done by most people. We are aware that a large amount in the aggregate, throughout New England and Northern New York is annually made, but we are also aware that five times the amount could be made if there were any regular and systematic effort made to see how much could in reality be manufactured during a common

Now if the writer in Hunt's Magazine is right in his estimate, and we are right in saying that five times as much could be made without any very extra exertions, except more complete and thorough preparation, instead of 28,000 tons, we should have 140,000, which would relieve the pressure of a deficiency of Southern sugar very materially. Would it not then be wise to take time by the forelock and prepare in season for a vigorous sugar campaign. We do not know what amount of money is usually expended in the pur- above. chase of sugar, both foreign and domestic. By domestic we mean New Orleans sugar. The supply from that market is at present stopped and may not be counted in. But the foreign imports are probably increased. Five years ago we imported from foreign ports, fourteen millions four hundred and eighteen thousand eight hundred eighty-seven dollars' worth of brown sugar, and two hundred and forty-one thousand dollars' worth of white sngar, a total of commodate Transient or Permanent Boarders in a style \$14,659,887.—Now if we already manu- public patronage is solicited. It is, therefore, of the greatest importance, that the sys-

tem of medication best adapted for the protection of soldiers against sickness, as well as that known to be the most speedy and effectual in restoring the sick to health, without regard to professional prejudice, be adopted. This is no time for medical martinents to quibble about professional dignity. which has already prove itself in over fity regiments now at the seat of war near Washington, to be a positive preventive against sickness in the form of CHILLS AND FEVER, FEVER AND AGUE, BILIOUS FEVER, TYPHOID FEVES, DIARRHOEA. DYSENTERY, SMALL POX. MEASLES, and other malarious and infectious diseases. Bear in mind, we say, that Radway's Ready Relief will protect, the troops exposed to these diseases against attacks. Now, it is conceded by all the medical men in our army, that they have no reliable means to prevent attacks of these diseases, neither have they any positive assurance of curing the sick ; but, on the contrary, the majority of the sick, seized with fever and ague,

typhoid, bilious and other fevers, either die, or linger along, until they are reduced to mere wrecks and walking skeletons. Experience has established the fact that the treatment of calomel, quinine and mercury, in cases of fever an ague, typhoid fever, and other fevers of this class, is more injurious in camps than in private practice, when we take into consideration that canvas walls and expesure to heavy dews and the malaria from pools of water and damp grounds, prove but a poor shelter for the sick, we may readily conjecture that the penalties of mercurial and quinine treatment will, in the majority of cases, be exhibited in the form of rheumatism, neuralgia, pains and stiffness in the joints, enlargement of the liver, jaundice, yellow janders, dyspepsia. pleurisy, coughs,
