The Great Exhibition.

On Thursday evening, of last week, J. G. Stevens Esq., the Secretary of the Provincial Board of Agriculture, lectured, in this Town, on Agriculture, the object of the existence of the Provincial Board, and the proposed Exhibition at Sussex in October next.

Our first feeling, in connection with this meeting was shame at the sparse attendance. To have the Board take the trouble to send, and Mr. Stevens the trouble to come for a purpose so important and interesting, and then to find the Chief Town of the most flourishing and intelligent County in the Province respond by an attendance of less than a score was, we very respectfully think, simply disgraceful. However, so it was. Are we to take the attendance at the meeting as a correct criterion by which to judge of the interest really felt in the proposed Exhibition, or may we hope that outside of the town, there is a generous spirit of rivalry at work, prompting our Farmers and others to make some prepations, in order that Carleton County may show to the Province assembled at Sussex, something worthy of her name and fame. We do indulge the latter hope. The lecture of Mr. Stevens was a good one, one that would do the whole Province good to hear and reflect upon. Mr. S. brings the subject home at Union Hall, Upper Corner, on Wednesday eveto each individual of his audience, shewing that ning next at 72 o'clock. upon individual care and individual exertion the future of the Province depends. We are told how laggard want of faith which had so long clogged Three Days in the Highlands. him, but how that he suffered a relapse into the slough of desponding unbelief.

Shall we not now arise? Will not our people, inspired by the facts which are being daily forced upon them, proving the superiority of the Province, see to it, that individual duty is not neglected in the attempt now to be made to place us right before in London, New Brunswick was represented in manner to encourage the belief, not then at all unpopular, that we were little better than semi-barbarous and, as Mr. Stevens stated, but for the fact that soon after we sent home in the "Marco Polo" a specimen of naval architecture, which gave us a tion of specimens of our native productions, and the fruits of our energy and taste, gathered at Sussex, Scient inducement to all to contribute what they means of selections, and choice for the other.

Come then, let all, Agriculturalists, Mechanics, Artists, Amateurs, all for their own credit, as send their choicest specimens to the Sussex Exhibition.

The following is a record of the proceedings at the meeting handed us by the Secretary :
