"On Tuesday I was down to Baccaro, and in cruising along the beach I noticed that the veins of of sate, and that it is full of those quartz veins. "Yesterday about sixteen men were at work pro- diseases. specting, with what success I do not as yet know. But I have not the least doubt that when they sink a pit in the bank they will find a rich deposit, and perhaps some large nuggets; for I think this will te as rich diggings as any in the Province-but time of course will tell. I will write you again, in case there are any fresh discoveries.'
