" A Subscriber, ' and perhaps well wishing friend writes us to enquire " why we advertise patent medicines." We will here and now answer him that we do not. Our readers are aware that we have for years excluded everything of the sort, and the only seeming exception that we know these are not "patent" or even secret medicines. Their composition has been made as publicly known as any other scientific fact and has moreover had the approval of the highest medical authorities in the land. But what affords us perhaps still greater confidence in their worth is our personal knowledge of the man who makes them and the results that have followed from their use; results as familiar to our readers and to the whole commu-

Ayer ever since he graduated from the Penn, University in the same class with one of our personal friends, nor have we ever ceased to watch with interest his singular success in an untiring devotion to the noble profession he has chosen.
