

THROAT AFFECTIONS. (From Dr. G. F. Bigelow Boston.) "Brown's Bronchial Troches are a simple and elegant form of administering, in combination, several medicinal substances, held in general esteem, among physicians, in the treatment of Bronchial affections."

A "Subscriber," and perhaps well wishing friend writes to enquire "why we advertise patent medicines." We will here and now answer him that we do not. Our readers are aware that we have for years excluded everything of the sort, and the only seeming exception that we know of is the advertisement of Doct. J. C. Ayer & Co's remedies which now stands in our columns. If our friend does not know we will inform him that these are not "patent" or even secret medicines. Their composition has been made as publicly known as any other scientific fact and has moreover had the approval of the highest medical authorities in the land. But what affords us perhaps still greater confidence in their worth is our personal knowledge of the man who makes them and the results that have followed from their use; results as familiar to our readers and to the whole community as they are to ourselves.

It has been our privilege to know Doct. Ayer ever since he graduated from the Penn. University in the same class with one of our personal friends, now have we ever ceased to watch with interest his singular success in an untiring devotion to the noble profession he has chosen. If anybody will tell us what we can advertise of more interest to our patrons than remedies that will cure them when they are sick we shall cheerfully give it the benefit of our circulation.—*Tamarac (Ill.) Baptist.*
