From England and St. John the intelligence comes that the price of deals never was so low before, and The Chairman said he was glad to see so many that many dealers have fallen beneath the pressure of the times; the consequence will be that unless some change occurs before June or July, the price of logs must go down exceedingly low. I was blamed then for displaying sympathy with the rebels, but the result showed that my views were correct. When Lord Durham came out here, charged by the Imperial Government to investigate the cause of the troubles, his decision was that the people had been wronged and improperly governed by people sent from over the water, clothed with no responsibility to the people and quite careless as to the results, and who deprived the colonists themselves of all the offices and honors. The establishment of Responsible Government, in the British American Colonies, was the result, and the management of colonial affairs fixed on a basis, such as would prevent the recurrence of such troubles in the future.
