HUMAN SYSTEM.

THIS is an age of enquiry. People want to I know why and wherefore of all statements submitted to them as facts, and as far as this

is concerned, it is proposed to gratify them. All the physicians admit that the greatest difficulty they encounter in their practice is in conveying to the seat of a disease the medicament that will counteract and neutralize it. Electricity has been tried for this purpose, but it is now generally admitted that the electric fluid is too subtle an agent to be made the vehicle of medication. It shocks the nerves, but can not distribute through the system anything except itself. Medicated electricity is, in short, an exploded humbug. But a liquid stimulant, as everybody knows, can be charged with the essential properties of any and every substance in the Materia Medica, and there is no herbial extract which will not hold in solution with all its preventative and curative virtues unimpaired. Now the pure liquid stimulant of which
