MODE IN WHICH

## HOSTETTER'S

### STOMACH BITTERS

ACT UPON THE

HUMAN SYSTEM.

THIS is an age of enquiry. People want to knew why and wherefore of all statements submitted to them as facts, and as far as this

is concerned, it is proposed to gratify them. All the physicians admit that the greatest difficulty they encounter in their practice is in conveying to the seat of a disease the medicament that will counteract and neutralize it. Electrimedication. It shocks the nerves, but can not distribute through the system anything except itself. Medicated electricity is, in short, an exploded humbug. But a liquid stimulant, as everybody knows, can be charged with the essential properties of any and every substance in the Materia Medica, and there is no herbial extract which will not hold in solution with all its preventative and curative virtues unimpaired. Now the pure liquid stimulant of which

### Hostetter's Bitters

are in part composed, is charged with invaluable vegetable remedies, and these by reason of its powerful diffusive principle, it conveys to every organ and introduces into the circulation. To use a common expression, it goes to the spot, taking with it just what is wanted there. The essence of rye would undoubtedly diffuse itself through the organization as swiftly if administered pure and simple, as if mixed with the jui- Dry & Fancy Goods of every description ces of tonic and alterative roots, barks and herbs. But of what use would it be without their healing, strengthening, life-sustaining balm? It would merely excite. It could neither protect nor cure. And herein lies the essential difference between the effect of the purest stimulant when given alone, and the same stimulant when administered in the medicinal form of

These are a few of the direct signs of dyspepsia, but as it is generally complicated with specific affections of the bowels, the liver, and the nerves, its victims have many additional torments which are technically attributed to other causes. It is easier to prevent disease from getting into an organ than to expel it after it becomes a "chronic fixture." Consider the first indication of uneasiness in the stomach as a sign that dyspepsia is preparing to attack, and baffle it at once with this great repellant.

But if it is too late to prevent, remember that it is not too late to cure. It is believed that there is no case of chronic indigestion that can with stand the remedial operation of
