

A COMMON SENSE VIEW OF THE

MODE IN WHICH

HOSTETTER'S

STOMACH BITTERS

ACT UPON THE

HUMAN SYSTEM.

THIS is an age of enquiry. People want to know why and wherefore of all statements submitted to them as facts, and as far as this

Great Protective and Invigorant

is concerned, it is proposed to gratify them. All the physicians admit that the greatest difficulty they encounter in their practice is in conveying to the seat of a disease the medicament that will counteract and neutralize it. Electrinow generally admitted that the electric fluid is too subtle an agent to be made the vehicle of medication. It shocks the nerves, but can not ploded humbug. But a liquid stimulant, as ev- exchange for above mentioned Goods, by erybody knows, can be charged with the essential properties of any and every substance in the Materia Medica, and there is no herbial extract which will not hold in solution with all its preventative and curative virtues unimpaired. Now the pure liquid stimulant of which

Mostetter's Bitters

are in part composed, is charged with invaluable vegetable remedies, and these by reason of its powerful diffusive principle, it conveys to every organ and introduces into the circulation. To use a common expression, it goes to the spot, taking with it just what is wanted there. The essence of rye would undoubtedly diffuse itself through the organization as swiftly if administered pure and simple, as if mixed with the juices of tonic and alterative roots, barks and herbs.

WE are now selling, at Low Prices, all kinds La dies' FURS; Gents' Otter, Beaver, Sealskin and But of what use would it be without their healing, strengthening, life-sustaining balm? It would merely excite. It could neither protect nor cure. And herein lies the essential difference between the effect of the purest stimulant when given alone, and the same stimulant when administered in the medicinal form of

Hostetter's Stomach Bitters.

Good Monongabela spirit is doubtless the mild est and most innocuous of all the varieties of liquor, but it only becomes a healthful medicine when impregnated with the vegetable elements! employed in the preparation of the Bitters.

To Dyspeptic Sufferers.

Under the general head of Dyspepsia may be classed all the varieties of indigestion. Its symp- | mises. toms are so various, and differ so much in different individuals, that it is almost impossible to classify them. In fact, some of them are utterly 1866. indescribable. It may be safely asserted, however, that half of the diseases of mankind spring from a disordered state of the stomach; and that the other half, whatever their origin, react upon a bloated and full feeling about the stomach and abdomen immediately after eating a gnawing sensation, or a sense of hollowness at the pit of the tomach between meals, a heavy dull feeling in the head, feeble or unsteady appetite, occasional nausea, re tlessness during the night, and a weary unrefreshed feeling on rising in the morning, palpitation of the heart, depression of mind, sometimes amounting to monomania, loss of memory, confusion of thought, sour stomach, with raising of food, and a choking sensation in the throat, dimness of the eyes, pain in the diaphragm, fecbleness and disinclination for exertion, and sometimes emaciation and a corpse-like pallor. These are a few of the direct signs of dyspepsia, but as it is generally complicated with specific affections technically attributed to other causes.

The best abvice that can be given to any one who has the slightest predisposition to dyspepsia, is to fortify his or her digestive organs by the these Goods were brought to this Province by one of daily use of

the stomach, and this vitalizing preparation tone and renovate that organ. If the gastric paratus is in good working order, and can p fectly dissolve and thoroughly assimilate food submitted to its operation, there will be dyspepsia. If it cannot do this, it requires re forcement, and the best of all reinforcing age hould be forthwith resorted to. The stomach the commissary of the system. It supplies elements of life to the whole body. In it is p pared the material of blood, muscle, bone a fibre, and if it fails to purvey that material sufficient quantity, and of a proper kind, whole body suffers, and with it the mental ! ulties. Therefore protect the "Commissary I partment." Don't let the enemy obtain poss

This belief is grounded on twelve year's experience of the efficacy of the preparation. The first instance of its failure to give relief is yet unchronicled. If it ever had failed, the voluminous correspondence addressed to the proprietors from all parts of the United States and South America would at least include one letter expressing dis-Batisfaction.
