POMPEIAN HOUSES. HOW THE ANCIENTS LIVED.

I will endeavor to explain the usual interior arrangement of the houses, and it is believed that the houses in Rome were built on essentially the same plan.

The street-deor opens upon the vestibule, dieus apartments. Opposite the street-door, a seem to go wrong. ORIGIN OF THE INDIAN WAR IN THE UNITED STATES.—The correspondent of the New York
Tribune, says:—Colonel Tappan, member of the
Indian Peace Commission, has just returned to
this city, and reports that all the Indians represented by those who have met the Commission
in council during the present year, together with
those with whom Commissioners Auger and Cullen treated, numbering in all about 70,000, are at peace, carrying out the plans and purposes of the Commission, all having either gone upon the reservations set apart for them, or are on their way to them. Col. Tappan says that this has been accomplished simply because the Commis-sioners have been enabled by the Government, army, and people, to carry out in a measure their part of the contract, while on the other hand the 5,000 or 6,000 men, women, and children of the Cheyennes, Comanches, Apaches, Arrapahoes, and Kiowas, whom the Peace Com-Some of the English Courts had to suspend ment at Ottawa, where he examined their mode business during the recent canvass, because all of administering Indian affairs and its results,
