The following is a brief summary of an article in a late Atlantic Monthly on the recent

discoveries and improvements in surgery: By local application of a sufficient degree WHEREAS, in and by an Act of the General Assorbed, insensibility can be produced in any without giving him the least pain. A French surgeon has invented an instrument he calls the "secrassur," or crusher, to preform operations dangerous in surgery, on account of the loss of blood from the smaller vessels, if performed with a knife. It is formed of a fine chain gathered into a loop, which encloses the part to be removed, and by turning the screw the chain is tightened till the parts are separated. The blunt chain so turns up and twists the ends of the blood vessels that hemtwists the ends of the blood vessels that hem. Debentures and the taking of such security-

orrhage is prevented.

The eye is now examined by an instrument called the optholmoscope, by which the depths of the globe of the eye can be readily and fully explored, and through its aid a great deal of what has been written and conjectured about what has been written and conjectured about the conditions and require ments hereinafter particularly mentioned.

Be it therefore enacted by the Lieutenant Governor, Legislative Council, and Assembly, as follows:—

1. The said County Council of the Municipality of Carleton is hereby authorized to issue Debentures of Two Hundred Dollars each, to the amount of, not exceeding, Ten Thousand Dollars, in favor of The Woodstock Manufacturing Company, at the times, in the manner, and subject to the conditions and require the season, too numerous to mention.

which, in the late war, some surgeons would cut off arms and legs on account of trifling wounds. This complaint was often just. But one of the most distinguished surgeons in the world has lately written: "At King's College it is rare to see an amputation; in nine cases out of ten excisions (or the cutting out the diseased portion of the limb) should be performed in its stead."

A boy at the West was caught under a fallen log and had his leg broken and twisted upon

protruding through the flesh, and no doctor sand dollars, two sound legs.
