DISCOVERY OF THE SKELETON OF A GIANT

IN PENSYLVANIA.—" On Tuesday morning last, while Mr. Wm. Thompson, assisted by Robt. R. Smith, was engaged in making an excavation near the house of the tormer, about half a mile north of West Hickory, preparatory to erecting a derrick, they exhumed an enormous helmet of iron, corroded with dust. Further digging brought to light a sword, which measured nine feet in length. Curiosity incited them to enlarge the hole, and after some little time they discovered the bones of two enormous feet. WHOLE NO.—1099 They discovered the bolts of two endinguis feet.

Following up the 'lead' they had so unexpectelly struck, in a few hours time they had unearthed a well-preserved skeleton of an enormous giant, belonging to the species of the human family which probably inhabited this and other parts of the world at the time of which the Bible speaks, when it says: " And there were giants in those days." The helmet is said to be of the shape of those found among the ruins of Nineveh. The bones of the skeleton are gether. These remains were found about twelve feet below the surface of a mound which had which was not more than three feet above the level of the ground around it.
