A few Facts for Canadian Housekeepers!

by using.

None Genuine without the Stamp, R. W. & Co. (Fac-simile of Label, but printed in blue and gold.)

NICKELITE SILVER Is a compound Metal, the chief ingredient of which is derived from those extraordinary Meteoric Stones which are found in Northern Europe, and which are now said by scientific men to have descended from the planetary system. The combination with more due-tile Metals of this wonderfully hard and bright metal, but in such proportions as to retain its essential pre-perties, has been the result achieved by the inventors

of Nickelite Silver. **SPOONS & FORKS** made of the Metal are, for general domestic purposes, superior to anything known.

They are White, Hard, and Strong.
They resist Acids, Clean Easily, and Wear Well.
They are Silver in Color, tasteless in use, and endless in Wear. They are of one Metal throughout, of English fid-dle pattern, and of the best silver finish.

These unequalled table wares are specially adapted for HOTELS, TAVERNS, RESTAURANTS, and BOARDING-HOUSES, and for the families of FAR-MERS, MECHANICS, TRADESMEN, MINERS, and FISHERMEN; also, for every day and domestic use in the families of MERCHANTS, FROFESSIONAL MEN and PRIVATE GENTRY. Finally, they are within the reach of ALL CLAS-

SES, their lowness of price is unprecedented, they are in fact the cheapest and BEST VALUE in the weel All Nickelite articles are stamped with the trace mark, R. W. & Co., and are accompanied with a printed guarantee of quality from the manufacturers
