WILLIS & LAW,

DYERS AND FRENCH CLEANERS It is a well-known fact that all classes of goods get soiled and faded before the material is half worn, and only require cleaning or dyeing to make them look like new.

Try the GILBERT'S LANE DYE WORKS where every description of Dyeing and Cleaning is executed on short time, in the best manner, and at moderate prices. We have imported three new hands from some of the largest dye works in the old country, men of a great many years experience, and using only the best of Dye Stuffs, we feel confident that we can turn out goods of all kinds, Cleaned, Dyed and Finished in a style that cannot be surpassed.

SEND FOR TESTIMONIALS. A roof may be covered with a very cheap shingle, and by application of this slate be made to last from 20 to 25 years. Old roofs can be patched and coated looking much better, and lasting longer than new shingles without the slate, for one-third the cost of re-shingling. This Paint is practically ire-proof against sparks or flying embers, and for tin and iron has no equal, as it expands by heat, contracts by cold and will not corrode in the most exposed places. Roofs covered with Tar Sheathing Felt can be made vator-light at a small expense. The Slate Paint is EXTREMELY CHEAP!

Two to three gallons will cover 100 square feet of shingle roof, or 400 to 600 square feet of tin, iron, felt, matched-boards, or any smooth surface; although the Paint has a heavy body it is easily applied with a brush, and neither cracks in winter, nor rans in summer.

On decayed shingles it fills up the holes and pores, and gives a new substantial roof that lasts for fears. Curled or warped shingles it brings to their places, and keeps them there. It fills up all holes in Felt roofs, stops the leaks, and although a slow dryer rain will not affect it a few hours after applying. As nearly all Paints that are black contain tar, be sure you obtain our genuine article which (for shingle roofs) is

when first applied, changing in about a month to a uniform slate color, and is to all intents and purpose State. On TIN ROOFS our red color is usually preferred, one coat being equal to five of any ordinary Paint. For BRICK WALLS our bright red is the only reliable slate Paint ever introduced that will effectually prevent dampness from penetrating and discoloring the plaster. Our
