during the past and the present year, are some of you will live to see a great improve- ter weighing nine ounces. phenomena of unusual gravity. They are ment made in some of these respects. Do phenomena of unusual gravity. They are not, it is true, unexampled. But it is the very fact of their occurrence, now in one district, now in another, with a frequency which is only the more apparent the more carefully the history of the country is investigated, which complicates the economical aspect of the subject. Good and bad years, aspect of the subject. Good and bad years, and forty or five and forty were a large of these respects. Do not look upon this as hopeless (hear, hear):

A COMPLAINT was laid before Justice but it requires that people should think of it a great deal, for there is always somebody or other who thinks he is interested in maintaining the present state of things. There is London, with its four millions of people. I have lived in the West-end of London for six the assistance of any Councillor to try indeed, succeed one another in most parts of and forty or five and forty years-I really the case with him, Mr. Hammond disthe world, with an irregularity which as yet cannot remember the exact number (laugh- missed the complaint. Surely this is Brunswick: is regarded as capricious, although it has been reduced to a sort of rude average of expectation. It is accordant with this general all directions, yet when you open a window The meeting of the Woodstock Branch is regarded as capricious, although it has been reduced to a sort of rude average of expectation. It is accordant with this general law, which affects alike the green crops and the coreals of England, the vineyards of France, and the olive gardens of Italy, that the very conditions which stimulate the lux regret conditions uriance of the heaviest crops, aggravate the evils of years of misfortune. The powerful influence of the rays of misfortune. The powerful inguence of the rays of the sun in stimulation to the organic chemistry of the plant is the more sensible the more direct that plants may be almost seen to grow.— But the greater the need of water for the support of vegetiation. The greater loss, as a general rule, is the need of water for the support of vegetation. The greater loss, as a general rule, is the need of water for the weeping. As its from the eads waters of the Parent Society, prediction of the State of them, has divested the sight of justice, human and divine.

2. To expound and demonstrate the darm of the Society in a very leads the sentent and compelling them to consume it. This is sented the claims of the Society in a very leading New Ment and divinic. Sentent the sight of justice, human and divine.

2. To expound and divine. Sentent the sight of justice, human and divine. Sentent the sight of pustices, water of the sit of the sight of justice, human and divine. Sentent the sight of pustices, water of liberations, religions, to rive much as its own known by that the individual in his relations seas that the greatest depth of the water which provides the rainfall of the earth is evaporated, so is it in the close vicinity of the main source of supply that the cooling and aftracting effect of lofty mountain chains.

WASHINGTON LETTER. WASHINGTON, D. C., Aug. 25, 1877.

The President's Indian policy is of latest consideration here. It is wonderful how one important matter is dropped for another as they come along. One day the whole country will be on a tip-toe of excite- if anywhere, assessable. The question ment over some political question or other, taxing the salaries of Dominion functionaries a settlement of which it would seem, must is one that is fairly open to argument and occupy many days or weeks of the ruling owers, and the very next day it will be all lost sight of in the advent of some new complication or policy or excitement. We live in fast times. Politics and public affairs

following their inevitable developments.—
Indian matters we must look to now because we are shortly to receive a visit from a delegation of chiefs. They are two treacherous gation of chiefs. They are two treacherous to live at Ottawa, is no reason for his exdid when they gained from England the treaties of 1783 and the Ashburton capitulation.

SPEECH:

SPEECH:

Mr. President and Honorable Gentlemen of Let me conclude this letter by a little epiths, and one of President Hayes' last orders the Legislative Council: They have been abused and their ignorance I regret the circumstances which have ren- has been taken advantage of, but for all that,
