SATURDAY, OCTOBER 12, 1878.

SENTINEL Office, in Brick Building, directly opposite Post Office, up stairs.

PROVINCIAL EXHIBITION. With the hotels, public and private, either full to repletion or all their available accommodation pre-engaged, the calls upon regretted, however, that we have no woolen is to be remembered that is not fixed but private hospitality are numerous, but generously responded to; we know how it is ourself. Fredericton is naturally well adapted land at a profit. for gala occasions like the present; people from abroad have a fondness for her pleasant fondness for these large visitations. Fred- will be so well calculated for the holding of ericton has enterprising citizens and public provincial exhibitions. spirited; she has those who are prompt in rendering efficient service at times when prompt and energetic action is called for, and then she owns John H. Reid, without whom it may be safely assumed Fredericton would not have enjoyed the Exhibition of 1878, certainly not in its present building .-Fredericton is to be congratulated upon having so soon secured a building well adapted for Provincial shows; it is a question that people will decide according to private taste and appreciation whether the new building is or will be as handsome externally or internally as the one destroyed by fire, or as well adapted for giving effect to the varied display of these industrial expositions. Those who happened to have read the descriptions of the building published in some St. John papers, before they had seen the edifice itself, experienced disappointment. That description, externally, was of the building as structure here a reality, the heavy Italian cornices, the airy gables and minarets; the lefty, grand central convex tower, are not to be seen. They are on the plans, they

posing, but it may become so when finished

Internally the absence of ornamentation, of

paint, of even temporary decoration, prevents

that impression of harmony and general fit-

ness which struck one immediately on enter-

ing the old building at previous exhibitions However, it is enough to say the building i ame considerably increased, is practicable, not finished; the design is not developed get a general idea of what up-river has conthe details are incomplete, but the length and breadth of space is here well planned, of the factories and farms of New Brunswell roofed, well galleried. wick. And at this moment we meet a friend The building is 75x200 feet, with, or either side, a transept 20x75 feet. These transepts are devoted to offices, restaurants &c. So that there is an area for exhibits or the main floor of 15,000 superficial feet, minus the space occupied at the northern end by a raised dais for music, speakers, &c. Then a gallery 16 feet wide runs round the whole o the building-550 feet-affording a fine view of the lower floor, as well as good op- Bright." portunity for exhibiting light manufactures, fancy wares, pictures, &c. The roof is supported by a particularly light, strong and handsome system of trusses. So much for the building. At the hour appointed for the final opening of the Exhibition, upon this 8th day of October, the exhibits were as Campbell each show a Jersey bull. nearly all in and order in their arrangement as generally established, as is usually the case upon such occasions. But a short time

had elapsed after the opening of the entrance to the public, when Capt. Cropley's Company of the 71st Batt., a fine soldierly looking body of men, headed by the Band of that corps, marched on to the ground as a guard of honor to receive His Honor Governor Chandler, who, himself, soon after drove up, and being ushered into the building, was attended, upon the dais already referred to by the Judges, several M.P.P.'s and M.L.C.'s, officers of the militia, and representatives of the elite of the Province-the absence of the clergy was notable. Here His Honor

Pumpkins, best, G. Phillips; 2nd James Bridges. Celestials each left two cards, one inscribed in English and the other in Asiatic characters, Sir Edward Thornton, English Minister, was the first to return the call, and these high and mighty dignitaries sat si ffly with a narrow board between them (which the same it was brought from Chinee) and sipped

tea together. The credentials of office which were read to the President at the time of the presentation of the Embassy to him were written upon a strip of parchment about 4 feet long and neatly rolled upon a piece of sandal

The writing was in Chinese, of course largely and plainly inscribed, the characters resembling those we see on tea chests, and capable of joking who saw him, with gravest face and immovable countenance, place those heiroglyphics before the President, as an interpreter was reading it, and say, "Mr. President, please to look over the original

aud see if the translation is literal." Contrary to the general expectation, the reports reaching us from the yellow fever the party of nurses who went to Memphis CLASS 4 .- WOOLLEN AND LINEN MANUFAC- from here several have died, including the

> MORE LAST WORDS .- Earl Dufferin, in replying to the farewell address of the Irish Protestant Benevolent Society of Toronto. made use of the following language:-I am well aware of the useful nature of

it, and it is therefore to you and through you to the rest of our Irish fellow-countrymen in Canada that I feel irresistibly compelled to convey a last and parting entreaty. No one can have watched the recent course of events without having observed, almost with feelings of terror, the unaccountable exacerbation and recrudescence of those party feuds and reli gious animosities from which for many a long day we have been comparatively free. Now, gentlemen, this is a most serious matter. Its import cannot be exaggerated, and I would be seech you and every Canadian in this land who exercises any influence amid the circle of his acquaintance, nay every Canadian woman, whether mother, wife, sister or daughter, to strain every nerve, to exert cate this hateful and abominable root of bitterness from amongst us. Gentlemen, I have perous towns of Ireland -the city of Belfast would back down were it not against the wishes of ton and wool cloth, 1st; hair wreath, 1st; sofa into the hands of two contending religious factions. I have gone to the hospitals and beheld the dead bodies of young men in the prime of life lying stark and cold upon the hospital floor; delicate forms of innocent wo-H. Kimball-Bull, 1 year old, 1st; squas

men writhing in agony upon hospital beds, and every one of these struck down by an unknown bullet, by those with whom they had no personal quarrel, towards whom they felt no animosity, and to whom probably had they encountered them in the inter of ordinary life, they would have desired to show every kindness and good-will. But where these tragedies occured, senseless and wicked as they were, the occasions which produced them had long existed between the contending parties-traditions of animosity James Harper-Bull, 1 year old, Durham, and ill-will and the memory of ancient grievinsane than to import into this country, unsullied as it is by any evil record of civil strife-a stainless paradise, fresh and bright from the hands of its maker, where all have been freely admitted upon equal terms-the bloodthirsty strife and brutal quarrels of the Old World. Divided as you are into various powerful religious communities, none of whom are entitled to claim either preeminence or scendency over the other, but each of which B. Campbell-Jersey bull, 1st; wheat, 2nd; reckons among its adherents enormous masses barley, 1st; buckwheat, 2nd; wheat flour, 2nd. of the population, what hopes can you have H. E. Burtt-Pumpkin, 2nd; knit shirt, 1st. except in mutual forbearance and a generous A. Simonson-Black oats, 1st; 25 ears corn, liberality of sentiment. Why, your very existence depends upon the dissappearance of these ancient feuds. Be wise, therefore, in time I say, while it is still time, for it is the property of these hateful quarrels to feed on their own excesses. If once engendered they widen their bloody circuit from year to year till they engulf the entire community in internecine strife. Unhappily it is not by legislation of statutory restrictions, or even by the interference of an armed executive, that the evil can be effectually and when successful at the time-I am not alluding to anything that has taken place in Canada, but to my Irish experiences—areapt to leave a sense of injustice and of a partial administration of law rankling in the minds of one or the other of the parties. But surely, when reinforced by such obvious considerations self-preservation as those I have indicated the public opinion of the community at large ought to be sufficient to repress the evil Believe me, if you desire to avert an impending calamity, it is the duty of every human being among you, Protestant and Catholic Orangeman and Union-man, to consider with

> each other. (Applause). And now, gentlemen, I have done. trust that nothing I have said has wounded the susceptibilities of any of those who have listened to me. God knows I have had but one thought in addressing these observations know you regard me in order to effect ar object upon which your own the happiness of future generations so great-

The True Witness says :- There are al-

regard to all these matters what is the real

ready indications of uneasiness in the Conservative ranks, and there is a corresponding indication of hopefulness in the ranks of the Refor. party. The American papers say "protection" is impossible, and ridicule the idea of such a protective tariff as will exclude American manufactures. The American market has certainly great power, and if it "closes down" it may make the situation somewhat awkward Again, prominent Con-servatives have been heard to say that the protection promised by the Government cannot be given, and now that the "cry" has done its duty in returning the Conservative party, that they want to hear no more of it. This is, of course, the general opinion of the Reformers, and we are not surprised to hear that the Hon. Mr. McKenzie is not more in favor of protection now than ever he was .-But the great mistake he made was in not readjusting the tariff. If he had done that, udiciously and well, his Government would not have been disturbed. In fact it is, we believe, possible to readjust the tariff in such a way as to meet the requirements of the country, and to afford Protection sufficient to sumer satisfied. But now the country expects Protection, and it will be disappointe unless it gets it. But the country may expect too much. It may expect such a Chihas been as dull and silent as a "Banquet nese wall as will injure the carrying trade which the Province may feel proud, and dog and man was covered with blood, showing ions of a recent Act the Government are entrusted with the control of the agricultural trusted with the control of the agricultural of the province which the province of t hall deserted," no portions open save the and do harm otherwise as well.
