

THE ANCIENT RACE IN THE NEW WORLD. The Hebrews in the United States recently held a convention in New York. Twenty-three States of the Union were represented. As a religious organization, Judaism in the United States is divided into the orthodox and the union of American Hebrew congregations.

They differ in a good many respects—the orthodox retaining the old habits and customs; the other accommodating itself to the changed circumstances of the age and country. The Union now includes 115 Jewish congregations throughout the United States. Their committees watch over the action of the Government in matters relating to their faith; as for instance, calling the attention of the Government to the statement that the U. S. Consul at Galatz had committed the U. S. Government to the recognition of the Rumanian Government, notwithstanding the failure of that principle to promulgate full religious liberty as required by the Berlin Treaty.

Their committees also study carefully every thing relating to the well-being of the Hebrews in the United States. A long review of the industrial labor market, the special committee point out that it is a mistake to believe that the Hebrews do not follow the vocation of a farmer. The long engagement from agricultural pursuits, which a nomadic life in the East has caused, has caused the mistake—only to within a few decades they were not permitted to own a foot of land; their permanency in any country was precluded by the nomadic life of the East, upsetting the American of continental habits and the American results of the colonial tyrannies of the Hanoverian Gentry.

The committee declare that the Jew needs but encouragement in resuming the original position of his ancestors, to develop within him all these gifts for successful farming that are so beneficial to the country at large. They recommend the purchase of a large farm for the purpose of training young American Hebrew boys; the acquisition of a large tract of land for the purpose of the co-operation of the Jewish alliance in Europe to further the end. (Our Government might look into this Jewish desire to turn farmers.)

In the matter of education, the Hebrew Union is making vigorous exertions; among them, the institution of the Hebrew High School, an organization composed of the "women in Israel"—the daughters of Jewish—and formed in every city and town as a "Ladies' Educational Aid Society," each member thereof to contribute \$1 a year for the support of independent students of the Hebrew Union College in Cincinnati.

The majority of the Hebrew race in America are Russian and Polish refugees and their descendants. These appear to have formed the Union, while the Jews from other nations cling to the strictly orthodox view of subjects connected with their faith and lineage.

Ontario paper says of the claims of the Maritime Provinces that the balance of the Fishery award be used for their special benefit:—

"We are disposed to think the demand of the Islanders cannot be secured without creating a measure of discontent in the other Maritime Provinces, which might cause a break-up of the Confederation. The balance of the award, after paying Newfoundland, ought to go into the general treasury of the Dominion, and be used for Dominion purposes. The Fisheries are the common property of the nation, and not of the Maritime Provinces, and when it becomes necessary to expend money in protecting or stimulating them, such expenditure must be a common charge. We are persuaded that no Government, Conservative, Liberal, or otherwise, can ever be induced to take a contrary view."

Theoretically the fisheries are the common property of the people of the whole Empire. Practically they belong to those British subjects in the Dominion who live on the adjacent shores and make a living by fishing. Precisely that is taken from the fisheries of the Maritime Provinces, for the balance of the award has been made payable to the Dominion, and they alone should receive the compensation for what is lost.—*Fredericton.*

WHAT IOWA GIRLS ARE TAUGHT.—At the Iowa Agricultural College every girl in the Junior Class has learned how to make good bread, weighing her ingredients, mixing, kneading, and baking, and regulating her fire. Each has also been taught to make yeast and bake biscuits, puddings, pies and cakes of various kinds; how to cook a roast, broil a steak, and make a fragrant cup of coffee; how to stuff and roast a turkey, make oyster soup, preserve stock for soups, steam and roast potatoes so that they will melt in the mouth, and, in short, to get up a first-class meal combining both substantial and fancy dishes, in good style. Theory and manual skill have gone hand in hand.—*Vast stores of learning have been accumulated in the arts of cooking, preserving, and pickling fruits, and they have taken practical lessons in all the details of household management, such as cleaning, mending, care of beds and bedding, washing and ironing, care of sick, care of children, etc. The girls, we are informed, are also thoroughly grounded in science, mathematics, and English literature; but this is of slight moment compared with the foregoing catalogue of virtues. If there is anything that challenges the unlimited respect and devotion of the masculine mind it is ability in women to make their own household.—*St. Paul Pioneer-Press.**

BRITISH WORKMEN IN AMERICA.—It is said that the president of a Connecticut cutlery company has invaded Sheffield, the home of the edge-tool trade in England, and has engaged one hundred of its best workmen to come with their families to his factory in Connecticut. They are on the way, and in September they will be followed by a large number of skilled edge-tool makers from Germany. Other Connecticut workers of iron and steel have recently moved up a flourishing trade in Australia and some other colonies of Great Britain.

HORRIBLE DESTRUCTION OF NUISANCE.—The Paris Globe publishes the following telegram from Odessa:—The transport ship which left this port on the 10th inst. for Baghdad with a cargo of 700 Nihilists lost 200 of them on the way from disease, occasioned by overloading and the absence of all sanitary precautions. One hundred and fifty others were landed in an almost dying state. A second transport is being prepared under the same horrible conditions. The prisoners are packed like cattle in the hold of the ship."

FURNITURE IS AN INDISPENSIBLE ARTICLE OF THE HOUSEHOLD. We all have to buy it. Where to buy the best and the cheapest is an important fact to know. Call on J. W. Garst, at his factory, south side of bridge, and he will satisfy you that money can be saved by entrusting your orders with him. He is also prepared at the shortest notice to attend to all branches of undertaking.

AN INDIAN BOY IN THE CITY SERVICE.—An Indian lad named Joseph Delisle, son of ex-Grand Chief Delisle, of Caughnawaga, has received an appointment in the Crown Lands Department, Ottawa.

THE POTATO BUG.—Hon. C. E. Jones of Portland, Me., has applied air slacked lime to his potato patch, and the result is the vile potato bug, young and old, have left the field. He desires us to say that the remedy is simple, cheap and sure.—*Boston Journal.*

Boston drinks 15,000 gallons of soda, and 20,000 gallons of root and tonic every day.

Over 40,000 pounds of glycerine are used annually in the United States for mixing with beer.

John Cox, a brother of Mrs. Hull's murderer, is to be a candidate for the legislature in Chesterfield county, Va., in the autumn, having been defeated by only fifteen votes last year, and it is added that he is superior of sobriety and a worthy man.

People who went up Mt. Washington (New Hampshire) a few days ago were surprised to find the Summit House windows, on the exposed side, snowed up and frozen up, and the promenade platform, like the rocks about, still almost over shoes in snow, and every post and north-west-facing rock still covered to a depth of nearly half a foot.

Expensive wives make penitent husbands, and often pave the way to family ruin. Milliners are annually expended in Parisian "imitations" by those who seek to substitute "art" for "nature" with the use of a few bottles of Dr. Terrell's Favorite Prescription, the diseases and weaknesses peculiar to women are overcome, emaciation arrested, the cheeks "painted" with the bloom of health, and the ingenious appliances of "art" dispensed with. The Favorite Prescription is sold by druggists under a positive guarantee to cure.

A remarkable railway bridge is in course of erection in Scotland. The entire project, that on Inch Garvie, a small island in the centre of the Forth, is 530 feet high, about 100 feet higher than the loftiest chimney, and nearly equal to the combined heights of the London Monument and St. Paul's Cathedral.

DRINKING A LARK.—In the time of Julius Caesar, Lake Lucerne, situated in the Appenzels, about fifty miles southeast of Rome, and some 2,200 feet above the level of the sea, was a source of great annoyance. It received the rainfall of a large district, and was constantly pouring in excess, frequently destroying the laborers of the tillers of the neighboring soil and promoting disease. Julius Caesar therefore planned the drainage of the lake by a subterranean tunnel, but was killed before this could be done. In the intervening centuries since his death, various speculators have endeavored to complete the work, which at length has been admirably carried out, at the instance of the great banker, Rothschild, at a cost of \$10,000,000. The work has taken twenty-four years, and 35,000 acres of excellent arable land have been reclaimed, on which the farmer can expend his labor without fear of inundation. The drainage of the lake thus runs very high.

NIJIN NOVGOROD FAIR.—The great market of the eastern world has been held at the junction of the Volga and Oka Rivers, in Russia, every summer for hundreds of years. Here the nations of Europe and Asia meet with their products for trade. Cossack, Chinese, Turk and Persian meet every year, and with every variety of merchandise that mankind employs, from suppers to ginsengs, tea, opium, fur, food, tools, and last but not least medicines. C. Ayer & Co's celebrated remedies from America were displayed in an elegant bazaar, where the doctors might sometimes be seen. They are known and taken on steps of Asia as well as the prairies of the West, and are an effective remedy for the diseases that prevail in the youths of the North as well as the huts and cabins of the Western continent.—*Lincoln (Ill.) Times.*

WHAT THEY SAY OF IT: A FEW FACTS FOR THE PEOPLE.—There are but few preparations of medicine which have withstood the impartial judgment of the people for any great length of time. One of these is Dr. Thomas' Electric Oil. Read the following and be convinced.—Thomas Robinson, Esq., writes: "I have been afflicted with rheumatism for the last ten years, and have tried many remedies without any relief, until I tried Dr. Thomas' Electric Oil, and since then have had no attack of it. I would recommend it to all."—J. H. Earl, Hotel Keeper, West 5th St., P. Q., writes: "I have been afflicted with liver complaint for several years, and have tried different medicines with little or no benefit, until I tried Dr. Thomas' Electric Oil, which gave me immediate relief, and I would say that I have used it since with the best effect. No one should be without it. I have tried it on my horses in cases of cuts, wounds, etc., and think it equal as good for horses as for man."

—A. Mayber, Merchant, Warkworth, writes: "I have used Dr. Thomas' Electric Oil of Electric Oil, and it is pronounced by the public, one of the best medicines they have ever used; it has done wonders in healing and relieving pain, and is worthy of the greatest confidence."—Joseph Rusan, Township Percy, writes: "I have used Dr. Thomas' Electric Oil for a lame knee which troubled me for three or four years, and I never found anything like it for curing lameness. It is a public benefit."

Beware of Imitations.—Ask for Dr. Thomas' Electric Oil. See that the signature of S. N. Thomas is on the wrapper, and the name of Northrop & Lyman are blown in bottle, and take no other. Sold by all medicine dealers. Price 25 cents. NORTHROP & LYMAN, Toronto, Ont., Proprietors for the Dominion.

NOTE.—Electric—Shocked and Electrified. As surely as effect follows cause, so surely will disease eventually fasten itself upon a system deficient in vital energy. If tonic medicine is not resorted to in time, the necessary tendency of a weak discharge of the functions of the body is to disorder its organs. Investigation, prompt and thorough is the only safeguard. No renovator of lost flesh, nerve power and cheerfulness has more clearly demonstrated its efficacy than Northrop & Lyman's Quinine Wine. In this preparation, associated with the salutary medicines which form its basis is pure sherry wine and certain aromatic constituents, which impart an agreeable taste to the medicine, and give additional emphasis to its effects. In cases of general debility and dyspepsia it is invaluable and the desired effect is, in the vast majority of cases, remarkably soon and as decisive. That good natural appetite, which gives a relish for the coarsest fare, is insured by the use of the Quinine Wine. It is a tonic, it is a stimulant, it is a restorative, it is a purifier, it is a tonic, it is a stimulant, it is a restorative, it is a purifier, it is a tonic, it is a stimulant, it is a restorative, it is a purifier.

As surely as effect follows cause, so surely will disease eventually fasten itself upon a system deficient in vital energy. If tonic medicine is not resorted to in time, the necessary tendency of a weak discharge of the functions of the body is to disorder its organs. Investigation, prompt and thorough is the only safeguard. No renovator of lost flesh, nerve power and cheerfulness has more clearly demonstrated its efficacy than Northrop & Lyman's Quinine Wine. In this preparation, associated with the salutary medicines which form its basis is pure sherry wine and certain aromatic constituents, which impart an agreeable taste to the medicine, and give additional emphasis to its effects. In cases of general debility and dyspepsia it is invaluable and the desired effect is, in the vast majority of cases, remarkably soon and as decisive. That good natural appetite, which gives a relish for the coarsest fare, is insured by the use of the Quinine Wine. It is a tonic, it is a stimulant, it is a restorative, it is a purifier, it is a tonic, it is a stimulant, it is a restorative, it is a purifier.

On July 11th, at Southampton, York Co., Maine, adopted daughter of Nover and Mary A. Maudsley, aged 3 years and 3 months.
