MR. EDITOR,-In dealing with public questions through the press, there are two methods one or other of which is generally followed by writers. The first is to go straight to the point ; the second is by using words of doubtful import, figurative forme of expression, and by occasionally styling the doctrines held by one's opponent heresies, and such like, so to confuse the minds of the public that they are

unable to render an impartial verdict. I may here be allowed to state, that in discussing the subject at the head of this article I have endeavored to follow the first mentioned.
