We shall not discuss at present the ques-tion whether protective duties are justifiable under the circumstances in which the Govern-

Sir Richard Cartwright argues in opposition to the tariff from a free-trade standpoint, and we presume that there can be no doubt that he is a free-trader in principle. As finance Minister, however, he never adopted a free-trade tariff, and his party has always maintained the incidental protection, as it is termed, is the true policy for Canada. Now, there can be no tampering with free-trade principles. The tariff of Sir Richard Cartwright would have been con-sidered indefensible by English free-traders, and many of his own followers were of opining cough (she had commenced spitting blood) cent., both rates being incidentally protecand is now enjoying good health by the use of tive.
