From an orbit calculated by Messrs. Chaer-ler and Wendall at the Harvard College obed by Mr. Barnard at Nashville, Tenu., is approaching the sun. It will pass its peri-belion on Aug. 17 at about 130,000,000 miles from the sun. Its distance from the earth is 57,000,000 miles. It is not perceptibly varying, its inclination is very small, and its motion direct—peculiarities which suggest a periodical comet. Its brightness increases slightly, but it will not become visible to the

Two gigantic engineering schemes force themselves upon public attention. One is the proposal to pierce a railway tunnel through the Pyrenees, the convention for which has Carriage and Sleigh RUBBERS. just been signed by the French and Spanish International Railway Commission. The other scheme is for the formation of a comp any to construct an international railway connecting Europe with Persia, India, and China.

It appears that Sir. R. M. Stephenson, who has been endeavouring to arrange with Sublime Porte for the commencement of the work | SLEDS, SLEIGHS & CARRIAGES in Turkey for the last thirty-four years, considers that the negotiations are so far advanced as to warrant the formation of a company to work the concession which he thinks he will eventually obtain. He proposes to raise tions, a capital of £16,000,000, in £600,000 spection of intending purchasers. shares of £20, or 500f, each, "of which it is Repairing, Trimming, Painting, &c., done a proposed £4,000,000 shall be saved by troops' labor, leaving £12,000,009 to be subscribed." If Sir R. M. Stephenson hopes to induce the countries through which the line passes to supply troops to make it, he is, we fear doomed to inevitable disappointment. There are three other great schemes in embryo, namely, the Panama Canal, recently said to have been washed out; the African Inland Sea, the flooding of the Jordan Valley. The scheme for a baloon with saloon accommodation ad lib. to fliat passengers across the Atlantic and cut out trade temporarily carried on by several Ex. Barque Traveller lines of steamers appears to be rather in abey-anco.—Pall Mall Budget.

The cholera appeared at Albano, near Rome, on July 13, 1866, under very singular circumstances. It was on the occasion of some religious ceremony that attracted a great number of visitors to the Eternal City. who were gathered together in the grounds of the Papal Castle of Gaudolfo. It was after the ceremony, and the crowd were walking through the grounds, admiring the beautiful fountains and listening to the music of a military band. All at once some of them perceived in the sky, coming from the direction of the African coast, a great black cloud, divided down the middle so as to resemble the two wings of an enormous bat. A feeling of intense cold overpowered the specta-tors. In less than an hour a hundred and four persons had been stricken down by the disease. The cloud seemed to be charged with cholera as other clouds with electricity. Scientific men explained this curious phe nomenon by asserting that the cloud had formed over great stagnant pools in the and grasshoppers. The disease did not spread beyond the gates of Albano.

The troubles of the Union Baptist coloured church, Philadelphia, culminated on Sunday morning in a general fight while morning service was being held. The fracas was opened by brother Gardiner, President of the Beard of Trustees, who struck deacon Craig a mighty blow in the face when he attempted to read the lesson. The entire congregation became involved in the row, and the police finally cleared the building.
