A REAL BONANZA .- All is not gold that glitters in mining booms, and it is always safe to take a considerable discount off the stories told by prospectors. But making the most generous allowance for exaggeration, the fact of the discoveries of mineral wealth in the Rocky Mountains are of astonishing value. Gold has been found in fair quanti- UUTTIND ties, but the chief ' find' is in eilver, copper, the Pacific placer mines. TWILIGHT PHENOMENA AT MAURITIUS .-Twilight phenomena of a similar character to the appearances lately so prevalent in Europe were, according to letters just receiv-el, observed in the island of Maruritius This is especially remarkable, as in that is land, situated 200 above the equator, night, as a rule, follows the day without any noticeable transition. On several evenings of October, however, there was a splendid glow in the West quite half an hour after sunset, and when night had fairly set in this glow soon extended over the whole sky, being reflected on the clouds, and covering the island with a purple tint. The sea is described as apparently on fire, the vessels and their masts looking black, and standing out in bold relief. The same phenomenon was observed.
