Thousands of inventors have tried, during the last fifty years, to produce a washing machine which would replace the wash boiler, and that relie of the dark ages, the wash board. All have failed, however, until the recent invention of the Missouri Steam Washer, which utiliz s the principle well known to scientists, that steam is the greatest known cleanser, bleacher and disinfectant. This Washer is a small portable machine, and can be used on any cook-stove. It requires no nore skill or attention to run it than the stove upon which it is placed. It is made entirely of metal, and provided with a system of perforated tubes, by means of which steam and mo ion are communicated to the contents, and steam is passed through the clothes.

The result is that the dirt is thoroughly dissolved and eradicated by the operation, and after the c'othes are rinsed, they come out whiter and cleaner than any woman can wash them by hand.

clothes without rubbing or wearing them, it stands to reason that it will save money to any family using it, for it is a well-known fact that rubbing clothes on a washboard wears them more than The country has been flooded with worthless so-called washing machines; but please do not denounce this Washer as a humbug until you have tried it. Iissouri Steam Washer. he Best Washing Machine in The World.

As steam is far more penetrating than boiling water, this process will remove fruit stains and many other stains that cannot be washed out by hand. It washes equally well a lace collar or a heavy overcoat, and is so easy of operation that a child ten years old can use it (see cut). As it washes the
