The new departure at the University is not likely to be popular. The proposed system will require a longer residence than is demanded by any other college in the maritime provinces. Dalhousie asks an attendance of four years of something less than six months each. The course at Mt. Allison and Acadia is frequently if not in the majority of cases, taken in three years. Windsor requires actual attendance for a l ss period than the other three. Canadian students have not the time and money at their disposal of the average college man in the great English universities. This fact has hitherto been recognized by educational authorities, and ought more especially to impress itself upon the governing body of the University, which all classes are compilled to support .- Sun.

NEW BRUNSWICK RAILWAY BONDS. -We are indebted to the New York agents of the Company for particulars of the working of this railway, for the six months ending with December last. The result is: Gross receipts,

The rentals for the period amount to \$56,596, leaving a balance of \$66,784. It is estimated that the net earnings for the next six months will be about \$60,000, to which will be added about \$50,000 for stumpage, making in all \$176,000. The interest on the bonds takes \$146,000, leaving a surplus of \$30,000. The present value of a Canadian railway 5 per cent. bond, which is covered by current revenue, is at least par, and that is where New Brunswick bonds will no doubt presently be.

> This agreeable yet potent preparation is especially adapted for the relief and cure of that class of disorders attendant upon a low or reduced state of the system, and usually accompanied by Pallor, Weakness and Palpitation of the Heart. Prompt results will follow its use in cases of Sudden Exhaustion arising from Loss of Blood, Acute or Chronic Diseases, and in the weakness that invariably accompanies the recovery from Wasting Feyers. No remedy will give more speedy relief in Dyspepsia or Indigestion, its action on the stomach being that of a gentle and harmless tonic, exciting the organs of digestion to action, and thus affording immediate and permanent relief. The carminative properties of the different aromatics which the Elixir contains render it useful in Flatulent Dyspepsia It is a valuable remedy for Atonic Dyspepsia, which is apt to occur in

persons of a gouty character.

For Impoverished Blood, Loss of Appetite, Despondency, and in all cases where an effective and certain stimu lant is required, the Elixir will be found invaluable. In Fevers of a Malarial Type, and the various evil results following exposure to the cold or wet weather, it will prove a valuable restorative, as the combination of Cinchona Calisaya and Serpentaria are universally recognized as specifics for the above-named disorders.
