Mesers. Connell Bros., GENTLEMEN,-Having thoroughly tested the "IMPROVED LITTLE GIANT THRESHER," and Double Gear and Level Tread Horse Power and Wood Cutter bought from you last Spring, I can readily certify that I am in every respect fully satisfied with them. I was told before buying not to get a "Giant" for they would not clean grain when threshing fast, as the sieves were too small. But when I heard that you were making the sieves four inches longer than the American machine, thought you must have the machine I wanted. The long sieves add Goldies' Sun Patent, greatly to its capacity, without danger of wasting grain. Your Level Tread Horse Power is so very easy on horses; my team does not weigh over 2,100 lbs, and they can run it with great ease. It was so late when I bought that I could not get enough grain in a place to make one whole GOLDIES CROWN OF GOLD, day's threshing. I have threshed at the rate of four hundred bushels per day, for half a day at a time; the machine was not crowded any; the sieves were clearing themselves; threshing clean, and no grain going over. Every place where I used your Wood Cutter it gave good satisfaction; it is so light and bandy: can set it up in so small a space. I had no faith in it and bought it on condition, but I would not have any other now. One man said he had so little faith in that Cut- Goldles' ter that he would not let me saw his wood, unless I called his pile of wood a day's work, he always had the same amount of drags cut for a day's work before : I cut Yours truly, it in a little more than half a day.
