Great Improvements for 1886. THE aim of 'GRIP' is to se' forth, in an impartial and independent manner, the passing events of Canadian political and social life. Its Carteons speak more definitely and more pleasingly than who'e columns of editorial. In this pungent, easily appreciable, and artistic style of presenting a subject, the whole situation is revealed at a glance. The success of "GRIP" shows how well this fact is appreciated—its Cartoons on the present of the country being.

DISEMBOWELLING A MAN.—Thomas Callagin, 22 years of arr, was taken to Bel vue Hospital on New Year's day. He had had a d spute over drinks with Carl Theming, who stabbed him in the abdomen with a sheath knife. After Callagan had been in his cot for several hours he complained of intense pain in the abdominal region. A consultation was held, and the decision reached that t) save the man's life it would be necessary to perform the delicate and dangerous operation of exploring the abdominal cavity. As this operation in nearly every case results fatally, Coroner Messemer was called in and took the ante mortem statement of Callagan ; the man who stabbed him was also brought into his presence and identified. Callagan was then put on a stretcher and taken to the operating room, where the whole house staff and a number of well known physicians were gathered. After he had been Aræsthetized, the attending surgeon made an incision in

the abdomen about eix inches in length. COLONG TEA Then the intestines were slowly taken out and examined. Each section was wrapped in a warm antiseptic cloth and laid on the outside of the chest. This course was followed until all that could have been injured by the knife thrust had been examined. Five deep cuts that nearly severed the intestines were found. They were carefully sewed up as soon as discovered. The patient became exceedingly weak at this stage, and injec- strength and wholesomeness. More conomical tions of stimulants were given.
