1873 **GRIP!** 1886

Canada's Comic Journal.

Thirtieth Year of Publication.

THE aim of "GRIP!" is to set forth, in an im-
partial and independent manner, the passing
events of Canadian political and social life. Its
columns speak more definitely and more pleas-
ingly than do the columns of editorial. In this
pungent, easily appreciable, and artistic style
of presenting a subject, the whole situation is re-
vealed at a glance. The success of "GRIP!" shows
how well this fact is appreciated. Its cartoons
and illustrations are the most original and most
even more eagerly sought after than the cartoons
and humorous letter-press of the paper, though
the latter is equal to that of any similar publica-
tion on the continent.

For 1886, "GRIP!" is to be considerably im-
proved. The old covers to be discarded; the
paper to be changed to a lighter weight; the
design for the title page, a new arrangement of
the matter, and improved facilities for the artists
and illustrators of the cartoons, will materially im-
prove the typographical appearance of the paper.

The price will not be increased.
"GRIP!" is now the cheapest paper of its class
in America, and these improvements must de-
cidedly enhance its value. No one who takes an
interest in the political and social affairs of this
country should be without "GRIP!" as it presents
a complete and entertaining pictorial record, as
the panorama moves.

GRIP'S PLATFORM:
Honor without Vulgarities; Patriotism
without Partisanship; Truth without
Temper.

Only \$2 a year, Postage Free.

ARE THE NORTH WEST INDIANS DISAPPEAR-
ING? (Special to the Sun)—TORONTO, Jan. 5.

For some time past disquieting rumors
have been coming from the North West re-
specting the existence of a bad feeling amongst
the Indians, more especially amongst the
tribes of the powerful Blackfoot nation in Cal-
gary and Meleed district. With a view of
ascertaining the truth, the Toronto Mail has
dispatched a special correspondent to the
scene, his instructions being to lay the com-
plaints of the Indians before the public with-
out fear or favoritism. The correspondent
chosen for this important mission is
George H. Ham of St. Boniface, who was
one of the ablest of all the correspondents en-
gaged in reporting the suppression of the Re-
bellion. Ham left for the North West some
days ago, and will visit the chiefs and
head men of all the tribes reported to be dis-
affected, besides consulting those Protestant
and Catholic missionaries whose experience
entitles their opinions to great weight. He
will also interview the Indian agents to learn
what they have to say on the subject of the
sweeping charges made from time to time
against them as a body, by white travelers
as well as by their Indian wards. No effort
will be spared by Ham to secure a full, fair,
and absolutely trustworthy and impartial
statement of the whole Indian case. Ham
leaves off with a letter giving the views of
Archbishop Tache. His grace, while no
alarmist, is very much afraid that the In-
dians will not be satisfied with their last stand
against the encroachments of settlement and
civilization. He says, Indians act suddenly
and unaccountably. You remember the Min-
necota massacre of 1862. Two hundred and
eighty peaceful people were killed on the
early peaceful day of the very day of the out-
break and in a brief space of time the whole
state was thrown into the horrors of an In-
dian war. But don't report me as being an
alarmist; don't make it appear that I
predicted immediate danger; but I do say
that something that is to be done without de-
lay to avert the possibility of another outbreak.

Millions are talked about glibly in these
times without a clear understanding of the
enormous sum represented by the \$50,000-
000 left by Cornelius Vanderbilt, the elder,
or the \$20,000,000 left by William H. Van-
derbilt to his son. A Chicago preacher
helps one to realize the magnitude of such
fortunes by figuring out that if Cornelius
Vanderbilt had been born at the beginning
of the Christian era and had saved \$25,000
a year ever since, he would not yet have
made up his fortune of \$50,000,000; and
that if William H. Vanderbilt had been a com-
mon laborer and had saved at the rate of
one cent a day, he would not yet have made
up his fortune of \$25,000,000. These figures
at the time of his death, and still would have
had to toil and save for 2,115 years in the
future before amassing his fortune of \$250,
000,000. That calculation is based on the
usual chronology. Without such examples
to give one a measure it is difficult to form
a proper conception of such enormous sums.

THE NEW BRUNSWICK RAILWAY.—A new
baggage car, No. 107, belonging to the New
Brunswick Railway and fresh from their
shops at Moncton, has made its appearance
in this city. The road is also receiving 18
new flat cars which it has ordered from St.
John and will continue to do so until 300
have been received. Two hundred and six cars
will also be built. Each one of these cars
will hold 20 tons. The second one of the
new engines ordered by the company has
left the Moncton shops. These weigh
40 tons and cost \$45,000. It is reported.
In the spring, 2,500 tons of steel rails will be
received and laid at once. The road is ex-
pecting very much to see the increased facilities
for doing business and the prosperity of the
New Brunswick road under the splendid
management of Mr. The railway di-
rectly affects Bangor inasmuch as it opens up
a great country doing business with this
city, and, what is not only a great
country but is important and the number
of its inhabitants is increasing daily.—
Bangor Mail.

The estimate of the United States De-
partment of Agriculture for the principle
crops are computed and the aggregate prod-
ucts are as follows in round numbers: Corn,
1,600,000,000 bushels; oats, 820,000,000;
wheat, 73,000,000 bushels; of which, 34,000,
000, 23. The value of corn averages nearly
32 cents per bushel, and makes an aggregate
of \$515,000,000. \$5,000,000 less than the
value of the last crop. The decrease in the
product of wheat is 30 per cent, and only
17.0 per cent, in value, which is \$275,
000,000. The reduction of wheat is in the
valleys of the Ohio and in California. The
states of Ohio, Indiana, Missouri, Illinois
and Canada last year produced 170,000,000
bushels; this year, 80,000,000—a reduction
of 50,000,000 bushels. The production of
oats is 55 bushels to each inhabitant and
the aggregate volume is larger than in for-
mer years.

AN ENORMOUS PILE.—The money in the
United States treasury, New York, is to be
counted before it is handed over to the
new assistant treasurer. There is in the
vaults about \$186,000,000, of which more
than \$80,000,000 is in gold coin and about
\$107,000,000 in silver coin. Each bag of gold
coin contains \$5,000, and each bag of silver
\$1,000. Consequently there are 16,000 bags
of gold, and 37,000 bags of silver to be
handled. Each bag must be weighed, and
those that vary from the required standard
are put aside and their contents counted
piece by piece. The gold and silver certifi-
cates, greenbacks and national bank notes
must be counted note by note.

The Railway Age, in its review of railway
building during the last past year says the
length of main line, not including second
track sidings or renewals, laid in the United
States during 1885, was 3,113 miles. This is
about 700 miles less than the new mileage of
1884, and it is less than in any year since
1878, when the total was but 2,687 miles.
But for the last ten years the railway mileage
of the United States has been increased 54,
768 miles and now reaches, in round numbers,
the grand total of 1,285,000.

It is calculated that if the total wealth
of Great Britain were divided up it would al-
low \$1,215 to every man, woman and child,
or about \$800 more than the average in the
United States. The annual saving of the
thrifty class there amounts to from \$25
to \$50 per annum. Stationer, as the cable
news stated the other day, show that one
out of thirty six is registered as a pauper.
One tenth of the population are engaged in
agricultural pursuits, the value of whose pro-
ducts is from \$750,000,000 to \$939,000,000.

An Alderney cow, owned by Rev. D. D.
Gillespie, of Marlborough, N. Y., has yielded
since April 1st, when it was claimed as the
largest amount of butter ever given by a
single animal for a like period. From April
1st to November 1st the yield, as stated by
those who kept the record, was 392 pounds of
butter.

Dr. Watte, who has been employed by the
city of Boston for nine years to look after its
dogs, vagrants and otherwise, has during
that time, caught and killed thousands of
the animals, and he has never found one
case of hydrophobia in dog or man.

The number of immigrants landed at Cas-
tle Garden this year has been about 20,000
less than the number last year. May and
August are the only months which do not
show a decrease. The total number landed
since Jan. 1, including Tuesday's arrivals,
was 220,745. The class of immigrants are
much better than in former years. Only a few
paupers have been sent back.

The Pope has converted personal presents
many years ago. Money and has donated
the proceeds, \$29,000, to the College of the
Propaganda.

The average cost of a session of congress is
\$3,000,000. Newspapers and stationery
alone cost over 70,000.

A petition with 23,000 signatures in favor
of optional cremation has been presented to
the German Reichstag.

Lord Napier of Magdala states that of 18-
000 men in the army of India
which he had caused to be investigated not
one has been committed by a total abster-
nence.

ROYAL

BAKING

POWDER

Absolutely Pure.

This powder varies. A marvel of purity,
strength and wholesomeness. Here economical
than the ordinary kinds and cannot be sold in
competition with the adulterated low test, short
weight, alum or phosphate powders. Sold only
one. ROYAL BAKING POWDER CO., 106 Wall
Street, New York.

FOR centuries past inventors have racked
their brains to devise means of robbing
the human race of its health. Thousands of vari-
eties of Soap, Washing Compounds, Washing Ma-
chines, etc., etc., have been thrown on the Mar-
ket and still the luck-breaking washing Ma-
chine continues its work of ruin and destruction, an-
nually destroying millions of dollars worth of
clothing and driving thousands of women into
premature graves. But now the scene has
changed.
