Messrs. Connell Bros.,

GENTLEMEN,-Having thoroughly tested the "IMPROVED LITTLE GIANT THRESHER," and Double Gear and Level Tread Horse Power and Wood Cutter bought from you last Spring, I can readily certify that I am in every respect fully satisfied with them. I was told before buying not to get a "Giant" for they would not clean grain when threshing fast, as the sieves were too small. But when I heard that you were making the sieves four inches longer than the American machine, I thought you must have the machine I wanted. The long sieves add greatly to its capacity, without danger of wasting grain. Your Level-I bought that I cou'd not get enough grain in a place to make one whole day's threshing. I have threshed at the rate of four hundred bushels per day, for half a day at a time; the machine was not crowded any; the sieves worsely in threshing of the sieves worsely in the sieves worsely i themselves; threshing clean, and no grain going over. Every place where I used your Wood Cutter it gave good satisfaction; it is so light and handy: can set it up in so small a space. I had no faith in it and hought it on condition, but I would not have any other now. One man said he had so little faith in that Cutter that he would not let me saw his wood, unless I called his pile of wood a day's work, he always had the same amount of drags cut for a day's work before; I cut
