THEODORE CHILD contributes an interesting and important article on " Chantilly: The Chateau and the Collections," a full account of the marvellous estate recently presented to the Institute of France. An important paper on "The Winter Climatic Resorts of Three Continents" is written by a special student of that subject, Mr. WM. SMITH BROWN. The number contains two short Timothy-W. Low, 1st; J. With the current number of The Century Magazine begins its eighteenth year and thirty-fifth volume. As usual the November number is especially notable. Great value and, at this 8 DAY STRIKING CLOCKS time, wide popular interest attaches to Mr. Kennan's paper on the "The Last Appeal of the Russian Liberals," the text of which, for the first time in English, is included in his article,in fact, the appeal has hitherto not really been published at all. Considering the wide and growing popular interest in Russian life, literature, and politics, Mr. Kennan's series—the result of a special investigation of Russian politics, as seen both in Russia and in Siberia—is likely to create a genuine " sensation." The frontispiece this month is a portrait of Washington by Wright of Philadeiphia, made in 1784, and now for the first time engraved. The special art feature of the number is the sculpture of Agustus Saint Gaudens, of which several beautiful examples are reproduced, including two of his portraits in low relief, the large relief portrait of Dr. Bellows, the Puritan statue at Springfield, Mass., the caryatid from a chimney-piece in the house of Cornelius Vanderbuilt and the figure of an angel for the tomb derbuilt, and the figure of an angel for the tomb of the late Governor Morgon. Professor John T. Stoddard of Smith College contributes a second paper on "College Composites," in which he shows the results of his experiments in the combination of photographs, the examples being drawn from the classes of '87 at Amherst, Bowdoin, and Williams Colleges, Cornell, Harvard, Fine New Goods! Low Prices and John Hopkins Universities, and the Sheffield Scientific School. The conclusion of the Battle Series is emphasized in this number by an admirable presentation in text and pictures of the breakup of Lee's army and the surrender at Appomattox. The article is by General Horace Porter, and is entitled "Grant's Last Campaign." With the November number the Lincoln History reaches a most interesting part of the Great President's career, the period between his election and his inauguration, and one
