The Farmers Review says :-"There is no longer room for doubt that the potato crop of the present season is the largest ever grown in the United States. From statistics furnished by correspondents, based on actual harvest returns, it is estimated that the total yield for 11 States and Dakota will be 116,373,916 bushels. In the 1884, namely 858 bushels per acre, as reported by the department of agriculture, which, allowing for increase in acreage, would make a total of 100,272,143 bushels, or a grand total of 316,646,059 bushels, against 203,164,425 bushels in 1883; 190, 682,000 bushels in 1884; 175,029,000 bush els in 1885; 148,051,000 bushels in 1883, and 134,000,000 bushels in 1887."
