

# TERMS OF THE SENTINEL.

Subscription \$1.00 a year in advance; \$1.50 per annum in advance. Single copies, 50 cents. Notices not exceeding 10 lines, 50 cents. Insertions, 15 cents each subsequent insertion. Transient Advertisements should be accompanied by the money to insure insertion. Mr. J. H. Bates, Newspaper Advertising Agent, at Park Row, (Times Building), New York, is also authorized to contract for advertisements in the SENTINEL at our best rates. This paper may be found at the office of HOWLAND & CO'S Newspaper Advertising Bureau, (40 Spruce Street), where advertising contracts may be made for it in New York.

## The Garleton Sentinel.

SATURDAY, JUNE 2, 1888.

SENTINEL Office, in Van Watter's Brick Building, King Street, up stairs.

It is called from London that Mr. Bright is in a state of health that excites much alarm among his friends.

According to the *Canham World*, spruce logs found a ready sale at \$7.00, while last year they brought but \$6.00.

The "Small House" Houlton, has changed proprietors, Mr. Philbrick having sold out to Mr. Kimball, of Calais, for \$17,000.

At a fire in their dwelling, at Greenbush, Osh. Frederick M. Tye, his wife and three children were burned to death.

In Pennsylvania, on the 28th, an entire train of cars—passenger—was blown from the track. All on board were more or less seriously injured.

There was a rain fall on the 27th, in Indiana, Missouri, Iowa, Nebraska, and other portions of the West, from the effects of which the crops suffered much.

A WATER SPOT, in Nebraska, on the 26th, rushed over a wide section in a solid wall 16 feet high, sweeping away crops, and, it is feared, many human beings.

Intelligence from San Francisco is that the town of Chabro, in Yachien, has been destroyed by fire, 1,800 out of its 2,000 houses being burned, with the loss of several lives.

The Portland, Me., Press says that a suit has been entered against the N. B. Railway Co. for \$500, for loss of a carload of stock, through neglect, while on route from Houlton.

The blizzard in New York, it is said, killed off the English sparrows, which were regarded as a nuisance; song birds, that had been driven away by the sparrows, are returning to the parks.

It is said there are a thousand women in Pittsburgh, working in iron mills, making bolts, nuts, hinges and barbed wire. At the same kind of work, it has been found that women give better satisfaction than men.

John M. DODD, originator of the Gospel Army, formerly a captain in the Salvation Army, a resident of Portland, Me., was arrested the other day on complaint of his wife for bigamy. While being conveyed to Portland, he broke from the officer, jumped from the moving train, and has, so far, escaped capture.

The Mayor of Boston has appointed a colored man to a responsible office in the city government. The *Herold* says it is the first time that a colored man has been appointed to a position of trust in the government of the city, showing that the preference of the negro in the dispensing of public office is still so rare an occurrence as to excite attention whenever it is resorted to.

## The Treaty.

The U. S. Senate have begun consideration of the fisheries in open session. Senator Fry, of Maine, strongly opposed the treaty and advocated the enforcement of the non-intercourse features of the retaliation act.

## Kansas.

A writer to the *Telegraph* from Kansas, strongly discourages immigration from New Brunswick, saying the drawbacks there are too numerous to mention. He instances many cases of farmers whose entire possessions are mortgaged for 24 per cent.

## On the 24th.

Queen's birth day, the Queen Victoria Niagara Falls Park was the scene of a gala ball. The Canadian Park, sister to the park, was also the scene of a gala ball. A procession on the American side, of some 118 cars, is 21 miles long, and, of course, presents a rich array of natural beauty and grandeur.

## Rev. Mr. Longley.

It was hoped that the popular explanation made by Rev. Mr. Longley of Toronto, would prove correct and establish his innocence. The committee appointed to investigate the charges, however, has decided to recommend to the Conference that Mr. Longley be expelled from the ministry.

## In Quebec.

In the Quebec Assembly, there was a week's debate on the Inter-provincial Conference Resolutions and they were carried, there being a majority of 14 for the Government. An amendment by the leader of the Opposition, affirming that the B. N. A. act had given perfect satisfaction, was rejected.

## Conference Methods.

We regret to observe that leading portions of the press of the United States, feel called upon to condemn in strong terms practices resorted to, in the Methodist General Conference in New York, in connection with the election of Bishops, some of the methods, it is said, would have disgraced a ward case.

## Hard Lines.

A woman in Brooklyn, N. Y., keeper of a boarding house, unknowingly placed upon her table some oleomargarine butter. A spy of the State dairy association abstracted some from the table, had it analyzed, and had the woman arrested and fined \$50, and there was no evidence to show that she knew or suspected the butter not to be good.

## Annapolis Scourged.

Annapolis N. S. had a \$35,000 fire on Tuesday. The fire originated in the Victoria Hotel and burned the Dominion House and sample room; Bank of Nova Scotia; Spectator printing office; Mills & Gillis and County office; Malcom's grocery; West's hardware store; Victoria Hotel; milliner and dress store; post office and book store and outbuildings.

## London.

Some idea of the size and wonderful growth of London, may be gathered from the fact, stated by *Chambers' Journal*, that within the metropolitan police district, an area of 688 square miles, exclusive of the city proper, there is a population of 5,200,000, that the number of police is 13,800, and that, during the year 1886, 12,252 new houses were built, making 29 miles of new streets.

## Laughed in His Face.

A man, the other day, was killed in the streets of New York and his body carried to the morgue. Soon after the keeper was shocked when a woman, who proved to be the dead man's wife, visited the morgue, and looking into the face of the corpse, laughed outright. She was keeping a promise made to her husband once, when he ill-treated her, that she would live to laugh in his coffin.

# All About a Bustle.

There was a bustle in Montreal over a case in Court, or rather the case involved a bustle. A Montreal tailor measured a lady for and made her a cloak, but when she came to try it on it did not fit, and payment was refused. A suit was entered, the plaintiff claiming that the fit was all right, with a proper bustle. The judge, after due deliberation, decided against the tailor. Now, the question is, should not the size of bustles be regulated by legal enactment?

## English Opinion.

It seems to be assumed that to some extent the recent pronouncement from Rome was influenced by English Tory leaders; the result will, probably, be disagreeable to them. Sir William Harcourt, in a speech at Cordoba, probably voiced English public opinion when he said:—

"It is not by papal decrees that you are going to settle the Irish question—it is by giving justice to the Irish people, it is by giving to them the same rights of self government which you claim for yourselves, by giving them the same authority over their own affairs which has given peace and prosperity to Englishmen."

## New Finance Minister.

The many speculations as to who would succeed Sir Charles Tupper in the office of Finance Minister have proved fallacious. The name of Hon. George E. Foster was not mentioned by any of the newspapers that he had been called to the office after such a comparatively brief record in political life and to follow in the position the several notable public men who have preceded him therein—Tilley, Galt, Hinks, Cartwright, Tupper, etc. Mr. Foster's name is now added to quite a galaxy of eminent financiers.

Conspicuous him on his rapid rise, we hope he will add largely to the reputation of himself and the office.

Now, that the Finance Minister has been appointed, leaving the portfolio of Minister of Fisheries without a head, many rumors of Cabinet changes abound, but it is not wise to accept rumors in the matter as correct. We may as well wait and see what unexpected thing happens.

## The Session.

Among the measures passed during the recent session of Parliament, of most general importance, are the abolition of the railway monopoly in Manitoba and the Northwest; the providing for a Legislative Assembly for the Northwest Territories; an amendment to the railway act which will prevent discrimination in rates either in favor of or against localities or individuals; and to make all transportation contracts open to inspection; a non-restricting speculation in stocks; a provision by which, except in Algoma and Carleton Place, general elections will be simultaneous throughout the Dominion; a change in the law of criminal libel by which action can only be taken within the province in which the offending publication is made; ratification of the fishery treaty; the authorization of a new loan of \$25,000,000; the suspension of the Montreal and Quebec harbor debt; authorization of government to direct interest on savings' bank deposits; the extension of the Ohio and Erie ship railway bonus; and the addition to the free list of several articles before dutiable.

## The Government.

The Government, from the beginning of the session, maintained its large majority; the discussion of the unrestricted reciprocity question, in which the Liberal party, and its great leader, were unanimously, was the greatest defeat of the session; what effect it may have upon the country, and how future development of public opinion upon the subject may influence the Government to give it more favorable consideration remains to be seen.

## Marine and Fisheries.

The petition of Minister of Marine and Fisheries presented by Hon. Mr. Foster, has been filed by the appointment of Mr. C. H. Tupper, M. P. for Pictou, N. S., who is a son of Sir Charles. Mr. Tupper, we judge from his record in Parliament, and from the terms with which he is referred to even by the liberal papers, is a gentleman of considerable ability, though not possessed of that force and strong individuality of character which distinguishes his father. He is quite young and this gives another indication that the young men of the country are coming to the front.

The recent Cabinet changes are reminders of the probable final withdrawal of Sir Charles Tupper from active politics in the Dominion, although it may be that as an occasional in the past he may arise in the future representing his temporary return desirable. Sir Charles has been an immense worker and has left an indelible impression of his energy and influence on the political history of Canada. His labor in connection with the fisheries commission and his views on the trade relations between this country and the United States, whatever the present and immediate results, may have a powerful influence in the future. One thing is very evident; Sir Charles goes with the aura of parliamentary greatness, with a long career in one of the most important places, with a more kindly regard, on the part of those to whom he has hitherto been politically opposed, than probably at any previous period.

## Our Advantages.

It is true that there is a good deal about our climate, in its lengthly winters, its variability and uncertainty, its storminess, as present, backwardness in Spring, owing to which farmers endure much delay in getting in the seed, that is discouraging if the matter is looked at without reflection. But the fact is that when you are in contrast with the climate and climatic associations of other countries and its advantages and disadvantages compared with theirs, there are not wanting many redeeming qualities, which stamp ours as the more preferable. No matter how backward our Springs may be, the seed time is sure to present itself, and after that, vegetation is so exceptionally rapid as to bring the crops to maturity within the limits of the harvest season. The present Spring has been backward; a week ago and on fields and forests there were few evidences of returning life and vigor, but now the grass and leaves and flowers, well advanced in development, declare to the marvellous rapidity which is an incident of our climate. The farmers have to bestir themselves in preparing the ground and getting in the seed, but the former is easy to do and the latter is scarcely covered up before the new plant is bursting through the soil. In some sections which at first blush appear to be more favored and better adapted for the labor of husbandry, the soil is less mellow to the plow, the operation of the laws of nature which govern the quickening of our soil, and its progress is more tardy, and the returns longer waited for are not more abundant or more sure. Then, while our farmers may be delayed by cold rains which, however, have a beneficial effect in establishing the grass and securing that important item our hay crop, when we read as we do daily of the damage done to the growing crops of vast districts in some of the most highly cultivated States of the Union, by cyclones, and torrents of rain, and other elemental disturbances; when we read of ruin and desolation clouding the hopes of the farmers elsewhere and consider how singularly free we are from such visitations, it reconciles us to our minor troubles and enables us thankfully to accept the long yet healthy winter, the drawbacks that attend the seed time, and rest satisfied with the sure promise of abundant harvest.

## Railway Changes.

Mr. G. Rainnie, who has long and efficiently performed the duties of trackmaster on the N. B. Railway between Woodstock, St. Stephen and St. Andrews, has resigned, and will, probably, for a time, give his attention to "booming" a track lifter of undoubted merit, who has been called to the office after such a comparatively brief record in political life and to follow in the position the several notable public men who have preceded him therein—Tilley, Galt, Hinks, Cartwright, Tupper, etc. Mr. Foster's name is now added to quite a galaxy of eminent financiers.

## Wedding Chimes.

Mr. Horace E. Fleming, formerly of this county, on the evening of Wednesday May 23rd, at the residence of the bride's parents, 1806, East Tenth street, Kansas City, Mo. The ceremony was performed by Rev. Bowman Young, D. D., pastor of the Grand Avenue Methodist Episcopal Church of that city. The bride wore an elegant toilette of mahogany brown silk, trimmed with polished steel ornaments, diamond jewelry, corsage bouquet of Maroon, blue roses, and white gladioli. The bridegroom wore a suit of black cloth, with a white shirt and white tie. The ceremony was a like service for the groom. The bride's parents were numerous and elegant. Immediately after the ceremony the happy couple left for a trip to Spirit Lake, Iowa, and other northern resorts. The *SENTINEL* tenders congratulations.

## Honors Paid a Carletonian.

The following complimentary notice of a young gentleman well known to many of our readers, we clip from the *Greenfield* (S. C.) *Daily News*:—

## Prof. W. F. Watson.

Prof. W. F. Watson, who occupies the chair of Natural Science in Furman University, has received an invitation to attend the fourth session of the Geological Congress, which will be held in London this Summer. The congress will be composed of the leading geologists of the world, and the invitation to Prof. Watson is a delicate compliment to a rising young man in the ranks of natural science in this country. Prof. Watson is a native of New Brunswick, and he is undecided yet whether he will pay a visit home during the Summer or visit Europe and visit the Geological Congress on the trip.

## Personal.

Rev. J. E. Flewelling and Mrs. Flewelling, Centerville, spent a few days here last week. James McMillan represented the popular firm of J. & McMillan, St. John, registered at the Exchange last week, and spent the Sabbath in Woodstock.

## Rev. J. E. Flewelling and Rev. A. W. Tied.

Exchanged duties Sunday. Mr. Flewelling held service at Kirkland 10:30 a. m., and at Richmond Corner 7 p. m.

## D. T. Wheeler.

who has just come to do business here some 19 years ago, has since made his residence at Seattle, Wash. Ter., reached here on Thursday morning's train, en route to Fredericton, on a short visit.

## Rev. W. S. Neales.

Rector of St. Paul's, San Francisco, and brother to our Rev. Canon Neales, was unanimously elected secretary of the Diocese of California, at its late convention held in San Francisco.

## Mr. Robert B. Slout.

who so long and satisfactorily discharged the duties of Clerk of the "Gibbo House," and more recently of the "Wilbur," left here on Monday, bound for the West, and, we hope, good fortune. Le Croise, Wisconsin, is Mr. Slout's first destination.

## Rev. G. R. White.

who, for nearly a year, has filled so acceptably to his people the pastoral office of the Jacksonville Baptist church, left, on Wednesday evening, to assume the duties of pastor of the Yarmouth, N. S., Temple Baptist Church. On the Sunday previous to his departure, Mr. White preached farewell sermons to his respective congregations, and in the morning received three members into the Jacksonville church.

## Arbor Day.

RICHMOND CORNER. Arbor Day was observed in Richmond Corner District, by setting out a number of trees mostly to replace those that had died. One of the trustees provided a team, and the teachers and scholars boarded school and went away to the woods where the requisite number of suitable trees were secured. The trees were then planted in the school grounds, and the scholars thoroughly enjoyed the work of tree planting, and took a lively interest in imparting a more marked appearance of neatness to the interior of the school houses, and also to the school grounds.
