OTTAWA, May 22. Prorogation is fixed for to-day and Lord Lansdowne for the last time dismisses the National Legislature. At the same time the address of farewell from both houses of parliament was presented to him by members of the Privy Council. His Excellency leaves Ottawa to-morrow en route to Eogland. Wash Tubs, Pails. Brooms, Lord Stapley of Preston, will leave England for Ottawa, about the time his predecessor qualities of statesmanship possessed by Lansdowne though we will hope that he has as keen an appreciation of the duties of the head of a system of responsible democratic government. The cries will now be "Good-

bye Lansdowne," "Welcome to Stanley." IN THE HOUSE. A great deal of business and some lively scenes marked the last week of the session. Several Government bills were dropped including all clauses of the Franchise bill except the one suspending the revision of the voters' lists another year. This leaves the lists of 1885 still in force. By a majority of 21 the Government rejected Mr. Laurier's amending to conduct controverted elections on the latest lists, which was the smallest Government majority of the session, the largest

On Saturday the facetious member from Grey, Dr. Landerkin, took advantage of the items for the greenhouse on the grounds of Parliament Square to say that he had dropped in and asked the gardener for a flower but was told that the flowers were only for the tables of the Ministers. He was anxious therefore to know how much than cost the therefore to know how much thay cost the of his colleagues for the could say none of the flowers found their way to his table and he HAND WATCHES of every des-

THE GOVERNOR GENERAL'S SPEECH.

I don't suppose I will be impeached for betraying a state scoret if I tell how His Excellency prepares his public speeches. He delivered a notable one at the Russell House banquet the other day. It filled four long columns of the newspapers and was delivered off hand by the Governor General in reply to the toast of his health. But in the recess of his study at Rideau Hall His Excellency had spent many hours over that speech, carefully composed it and then wrote it out word for word and line for line. But he didn't speak from manuscript you say. No, for he had carefully conned every line and learned off every word, and if you compare the delivered speech with the manuscript handed to the reporters before it was delivered, you will find that he did not forget a single word. This has been the practice of former Governors and seems to have become a precedent for each seems to have become a precedent for each occupant of Rideau Hall.

It came out in a discussion in the House on Saturday that the breeding of salmon was a success in Canada up to the time the little and Marriage License. fish were allowed to swim away in the open waters. That is the last that is heard of them. Some think that they are gobbled up by the bigger fish. At all events there is no doubt they are left to do for themselves too young and ought to be kept in ponds and fed to another year as so. for another year or so.

## WARRIOR. WARRIOR MOWER!

The Old Warrior Mowing Machine to the Front again! I BEG leave to inform the public generally that I have secured the agency of the OLD WAR-RIOR MOWER of 1873 patent, for the County of Carleton.

The great many years it has been in successful use in the field has proved it to be superior in mechanical construction, lightness of draft, ease of m nagement, durability and capacity to do good work under all circumstances.

In claiming a superiority for the Warrior Mower over others, we would call special atten-Remember the place-In all the NEW SPRI G STYLES, in BLACK, BROWN and DRAB.

Mower over others, we would call special attention to the following points:—

The Guards are nearer together than those of any other Machine, being only 2½ inches from centre to centre, which is a very de-irable feature for the following reasons:

1st. It is almost impossible to stone the knives.

1st. It is almost impossible to stone the knives.
2od. It renders the Guards less liable to break.
3rd. It takes less power to do the work, be-3rd. It takes less power to do the work, because the grass is more evenly divided, is collected in smaller bunches, and consequently cut asier; and because narrow sections require less throw to the crank, which is shortened, and the work brought near the power applied.

4th. The finger bar has a wabbling or rolling motion in its length, allowing the points of the guards to rise or fall, and to rise out of the dead furrows or run over the cradle knolls with ease.

5th. The driving wheels are eight incher further apart than in most other machines, which allows them to run in the track made for them by the track clearer, and thus avoid running by the track clearer, and thus avoid running For Sale at Victoria Corner:
