THE BUTTERFIELD SPRING BED has been in use in this country nearly two years. From a very small beginn ng and with very little effort the trade has grown until the sales; have run up into the thousands, and with the exception of a slight defect in a few of the first manufactured the Beds have given universal satisfaction. In fact in many localities the very name has; become a syronym for Ease and Comfort. The, FXCRL-RIOR SPRING BED is a later invention which, while retaining all the elasticity ard freedom of action which characterize the Butterfrield, is so securely braced that there seems to be no possibility of the outside springs being bent inward under any circumstances.
