

Carleton Sentinel Supplement, Sept. 14, 1889.

Upper Woodstock Items.

Sept. 11, 1889.

The village is experiencing a healthy boom now. It has not been so populous for a long time as now. All the houses are fully occupied, and the streets and places of trade present an animated appearance. The families that have moved in this season have made an appreciable enlargement of the population and increase of business. A cordial welcome is extended to all who are worthy of such a greeting, and the hope is expressed that the new comers will find a pleasant home and good neighbors in our midst.

W. C. Ferguson has just returned from a three week's visit to Amherst, the home of his youth. This needed recreation has had a beneficial effect on his health which was not very good before he went away. During his absence he visited the scene of operations on the line of the Chignecto Ship Railway. The work is being pushed forward very vigorously, but owing to the magnitude of the undertaking it must be some time yet before this unique commercial highway will be open for traffic.

Richard Phillips who has not visited his native place for 16 years, dropped in to the village Saturday. Not only his mother, sister and son, were glad to see him but the host of the friends of his youth who still live in this section crowded around him to welcome him back. During his long absence he has been chiefly engaged in the rich mines of Wyoming and Montana.

Geo B. Wolhaupter, our popular postmaster and enterprising trader, has quite a well stocked livery stable. He has lately added to his vehicles an elegant double seated top buggy, a top phaeton and a Daisy gig. Mr. Wolhaupter has a good run of customers and his venture in this line is likely to prove a paying enterprise.

A good tonorial artist is one of the necessities in any well ordered community. Our newly arrived barber, Mr. Jenkins, seems likely to fill the bill. The probabilities are that he will do a good business here.

James Ryan, the genial proprietor of the St. John store, has the following visitors this week: Miss Kenney and Mr. Jas. Kelly, New York, and Miss McCue, St. John.

Mrs. Boyer with her daughter is making her home with her sister, Mrs. David Phillips.

Mrs. Robinson of Bay Verte, is visiting at Mr. Colby Henderson's.

The Misses McFarlane and Miss Annie Boone, are visiting Miss Mattie Brewer.

It goes without saying that the prospecting for the valuable metals of the Shaw Britton property a short distance above Upper Woodstock, is the all-absorbing topic of discussion among business men here. As the shaft goes down the indications of silver, copper, lead and gold, become stronger. Expert miners speak in the most sanguine terms of the ultimate success of the mine. Mr. Richard Phillips, who has spent years in silver mining, and who has himself owned a mining property, gives the most positive assurances that it is one of the best prospects for the depth it is yet sunk, he has ever seen. Under his direction the work will be prosecuted systematically so the lead may be fairly tested. He says all the indications point to a rich find, and the proprietors, Messrs. R. K. Britton and Albert Shaw, may wake up some morning and not only find themselves famous but rich, a consummation to be devoutly wished for. At all events a test will be made of what there is in it, and there certainly seems every reason to believe that riches are stored away in that lead among the hard quartz for some one to unearth.

Jubilee Division's basket social last Friday evening, was the event of the season. The attendance was good; loving hands had generously filled and handsomely trimmed a goodly array of baskets, the young people were in good spirits, and all went merry as a marriage bell. When the auction began expectation was on tiptoe, and bidding was most spirited. While some were disappointed in mistaking the basket desired, many were made happy, and the opinion is ventured that none came away displeased that they went. About \$18 were realized for the benefit of the Division, and a most enjoyable social evening was spent. A short programme was rendered, including an amusing dialogue cleverly given by Davy Palmer and Gabe Brewer; vocal solos by Miss Hattie Burpee and Mr. A. A. Brewer; instrumental music by Mrs. R. K. Britton and G. G. Hamilton.

Mr. Albert Brewer has gone to Moncton to rebuild the bridge that crosses the Pentecostias there. Mr. Brewer's past record as a bridge builder gives assurance that the work will be well done.

Mrs. S. Cromwell, is visiting Mrs. Lewis Brewer.

Men's and Boys Coarse Boots at prices that will please you, at R. B. Belyea & Co.'s.

Hartland Items.

Sept. 9 1889

A few words from Hartland may interest the readers of the SENTINEL.

A building boom has commenced in Hartland, and several buildings are in the course of construction.

D. H. Keswick Esq. of the firm of Keswick & Nevers, general traders, has nearly completed a large and handsome residence; the site of the building is a beautiful one, situated as it is on a hill and commanding a fine view of the village which nestles close to its base, and also a view of the St. John river. The enterprise as shown by this gentleman has awakened a like feeling in the minds of others who have commenced operations, and the quietness heretofore, has given away to the sound of the hammer, giving employment to a number of men.

Wm. Henderson of Windsor has underway a fine building, nearly completed, situated on Main St.

G. R. Burt Esq. has laid the foundation for a large building and is pushing it forward with his usual vigor.

James G. Campbell, also has a building well under way, these buildings when completed will be a credit to this place, and shows what pluck and energy there is in this community; success to them.

The nearness of a mill no doubt has a good deal to do with the present boom, and we trust that success will attend that branch of business, as a long felt want has been supplied in this place by the erection of a first class steam mill, owned by Alex. Shaw Esq. and contains, a rotary, clapboard, shingle cut-off and trimmer, giving employment to a number of men; orders are coming fast and the mill has been taxed to its utmost capacity to fill orders, and are now filling some large orders for the New Brunswick Ry. Co. The construction of a siding to the mill is much needed; and would facilitate the shipment of lumber, as it now is

all orders outside have to be hauled to the station, a distance of one mile, which entails considerable expense.

Miss Cris Matheson, who has been visiting her friends at Caribou, has returned home.

Outside of building, times are dull here. Farmers are busy taking advantage of this delightful weather to gather in their grain, which, according to all accounts promises to be a plentiful yield.

Many of the villagers are in dread of fire and well we may be. Should a fire take place, the whole village would go, as we have no means where with we could fight it. The river is low and water would have to be hauled some distance. Why not have water works?

Our good natured ferryman, S. D. Shaw finds it hard work to cross, as the water is quite low, and would fail altogether if his sagacious horse did not come to time.

Flag, half mast at "Riverside," Thursday, on account of defeat of the "Hartland Cricket Club" by the "Andover Boys." Try again.

We are sorry to learn that Alex. Nevers Esq. of the firm of Keswick & Nevers, has withdrawn from the business, owing to ill health: we sincerely hope that the cool Autumn weather will enable him to recover.

Shaw & Boyer, of this place, tanners, have shown us a sample of their first lot of "oil tanning" made up in "moosains;" the quality is good. Lumbermen would find it to their advantage to call upon these gentlemen, when wanting anything in this line; all goods will be warranted, as no cheap stock will be placed in the market. We are pleased to note that their sales of boots, wholesale, are increasing; they daily ship goods to all parts of the province, which speaks well for the quality and workmanship, as the competition is great. This department is under the management of Geo. F. Richardson, who is well known as an expert fitter of the foot. Parties in want of a good set of harness, heavy or light can be supplied by the firm, at prices sure to satisfy and of the best workmanship. Made by and under the supervision of S. Brown, an artist in this line.

J. F. Richardson is shipping several cars of clapboards to the Boston market, manufactured at Shaw's steam mill, a short distance below this village. A great deal of expense is connected with the handling of them as they have to be hauled to the station and each handling adds additional expense. We hope in a short time to see a siding placed to the mill.

W. D. Keith, who has been visiting his friends in Kings Co., has returned. D. Pine, has returned, after a short stay at his home, Kingston, K. C. Mrs. J. T. G. Carr, visited St. Stephens last week as a delegate to the Maritime W. C. T. U.

Station agent's garden is looking well, considering the extreme dry weather. Too much cannot be said in regard to the neat and clean manner in which the station grounds and buildings are kept.

We notice that one of our J. P.'s whose duty and oath binds to keep the peace is not unfrequently found, as it is called: "Three sheets in the wind;" ought this to be so?

Amasa Plummer, teacher high school, has invested his means in the purchase of a horse and wagon. Now girls get on your hats!

A movement is on foot, to place a sidewalk through the village, and as far as the school house, which is greatly needed; the nice sum of \$60.00 has already been subscribed.

A public temperance meeting will be held in the F. C. B. Church, Friday evening, under the auspices of the W. C. T. U. The meeting will be addressed by Mrs. Trenholm of Nova Scotia, and others.

The best quality and lowest prices in Boots and Shoes is to be had at R. B. Belyea & Co.'s

Jacksonville Items.

Sept. 10, 1889.

We are having a very dry season; no rain for over four weeks; nearly all the wells in the village have given out. The weather is extremely warm.

There is a good deal of sickness at present; several cases of typhoid fever.

The oyster supper at the residence of Mr. Jas. Good last Thursday, was a decided success financially as well as socially. Everybody went and had a good time, and as a result \$26.75 was realized for the Baptist Church fund.

The Lodge still lives. The following were elected delegates to attend the District Lodge which meets with Brunswick Lodge: I. Slipp, H. Harper, John Emery, G. R. Good and Chas. E. Brodrick.

There is to be a very interesting event in our village this week, the principal parties being one of our popular young ladies and a young gentleman of Marysville.

Fifty Cases Ladies, Misses, Gentlemen's and Children's Overshoes and Rubbers, all sizes and styles, just received at R. B. Belyea & Co.'s.

Lakeville Items.

Sept. 9th.

The usual greeting for two weeks or more has been: "What beautiful harvest weather we are having." The reaping machines have been busy cutting down the golden grain and, if we can judge from appearances, we are to have a bountiful harvest. Scarcity of water seems our greatest affliction.

We are happy to state that Burns King, who has been very ill, is convalescing slowly but, we trust, surely. We will all be glad to see his merry face among us again.

Many exaggerated reports have been flying lately about a bear that has frequently been seen in the woods in the vicinity of our village. Mr. Bruin had become very bold as he came out on the road in some places to gaze complacently at the passers-by, and no doubt the hair raised on several heads when they saw his huge body. He was captured last week by Benjamin Crandlemire the famous Brookville trapper, and it is said the carcass weighed about 600 pounds.

Our little village is unusually dull at present. The summer visitors have all returned to their homes. Another of our young ladies, Miss Lena Carvell, has left us and gone to Uncle Sam's territory. She has accepted a situation in Newburyport, Mass., and, although we regret her departure, yet we say may success attend her.

We are sorry to hear that Mr. A. Hume is quite ill, but we trust his illness will not prove very serious. Miss Bessie Hume, who paid us a short visit from Bangor, has left us again.

Canterbury Items.

Eel River, Sept. 6 1889

The oyster supper and necktie sociable held on the 23rd in Grosvenor's Hall, proved to be a success; amount realized, \$15.00.

Our Division is in a prosperous condition. A paper called *Saturday Night*, edited by P. Girdwood and read fortnightly, is a source of much amusement to the Division.

Through the energy of our citizens we will soon be favored with a plank sidewalk. Most of the material for its construction is already on hand.

Rev. Mr. Colpitts preached in the F. C. B. Church, Sunday. Rev. J. W. S. Young occupied the Baptist pulpit. Rev. Mr. Porter preached in the Baptist Church on Wednesday evening; after the service, Rev. J. W. S. Young, wife and daughter Abby, received the Right Hand of Fellowship.

Wallace Scott leaves Tuesday for Woolville, N. S., to attend Acadia College.

Read R. B. Porter & Co.'s advertisement in to-days' issue.

Windsor Items.

Sept. 10, 1889.

The weather is very dry. Forest fires are seen in all directions; it is so smoky here to-day you can scarcely see the sun. It has been splendid weather for harvesting and farmers are getting pretty well through with their harvest.

Quite a number of our young men have gone, others intend going, West this Fall.

Mr. Alfred Tedford's father, mother and sister have been on a visit to their friends here, and expressed themselves very much delighted with the place. Mr. W. L. Cameron made a short visit here last week to his sister, Mrs. O. J. Connolly.

There is to be a sociable at O. J. Connolly's residence, on Saturday, the 14th inst., for the Baptist minister, Rev. C. R. Minard. He is a young man from Wolfville College, N. S., to which he intends soon returning; he appears to be a very fine young man and is much liked here. At the sociable there will be readings, recitations and music, and a very enjoyable time is anticipated. Should the evening not be fine, it will be held on the following Monday evening.

There is a good deal of improvement being made here this Summer in clearing land and building.

The F. C. Baptist friends are to work finishing their meeting house, and we expect the Baptist will soon have a meeting house; they talk of laying the foundation this Fall.

Carlisle Items.

Sept. 2nd 1889.

Dry weather and good harvests.

Mr. and Mrs. Alex. Hamilton, who have been the guests of Mr. and Mrs. T. W. Mangum for a few days, returned to their home in Summerville to day.

Rev. C. H. Orser and Rev. A. Giberson are visiting friends here. Interesting meetings were held on Friday evening, Sabbath and this evening. We are sorry to hear that the Brethren leave for their homes to-morrow; but we trust that the influence which they have, by God's grace, exerted during their stay, may remain, like "Footprints on the sands of Time," to cheer and comfort.

Gents Coon, Siberian Bear, Black Jap and Kangaroo Coats, just opened at R. B. Belyea & Co.'s.

Central Hampstead (Q. Co.) Items.

Sept. 6, 1889.

The annual Sabbath School Convention for the county met at Gagetown, on Wednesday last. The attendance was not up to expectation. On Tuesday evening Woodville School received a visit from Mr. Parsons, and a Mrs. Crafts, an American lady who has given her life, mind and soul to the good work. The black board exercise given by the above lady was of a very interesting nature, fully exemplifying the theory of teaching and putting forward many practical hints as inducements to bring the Bible under the influence of the young. Temporary seats were arranged and the meeting was held in the new hall. The arch work looks very beautiful, and altogether is a credit to the natives.

The telephone box has been placed in "Woodville House," and is in charge of Miss Ella Vanwart. Last Sunday some persons at the hotel were communicating with a family in Fredericton, and when calling up the right parties were surprised to hear the sound of music pealing forth. On enquiry the music came from an adjoining room from which the despatch was sent. Yes! we can say for a truth this is an advanced age we live in.

Steamer David Weston was delayed yesterday on account of the thick fog which caused her to be two hours behind time in reaching St. John.

How are you fairing my up river friends in respect to heat. We poor creatures have suffered more than a little during the last three weeks. You can judge when the thermometer stands 90° in the shade. The roads are something terrible. The surface is a bed of dust—very hard on polished boots.

Patrick Splan, our would be carriage maker, stepped down from the ranks of bachelorhood and took to himself a fair young dame from St. John, on the 7th. The steamer Star, which brought his fair one up the river, was alive with bunting in honor of the event. A warning to others to "go and do likewise."

Our schools have been very small so far, but as the rush of work is nearly over we hope soon to have our ranks filled again.

The colored folks at Otnabog, commenced their school last week, it being deficient of a teacher for seven or eight years past. A young man (colored) from Gagetown, who attended Normal School last term, will officiate. We hope success will attend the efforts of our "brethren."

No doubt several who read "Hampstead jottings" will soon pay us a visit, as your correspondent learns that the "General Conference" commences the first Saturday of October. Come one come all. "It's the land of corn and wine."

Mrs. A. E. Slipp, who has been ill for several weeks, is recovering slowly.

Rev. J. McKenzie will preach in the church on Sunday morning and at Woodville Hall in the afternoon.

Just one sentence more dear readers. The census of our thriving neighborhood was increased the other day by the addition of a little stranger. Such is life.
