C. O. Lepper, Druggist, Fort Wayne, Ind., writes: "My little sister, four years of age, was so ill from bronchitis that we had almost

given up hope of her recovery. Our family physician, a skilful man and of large experi-

UNION FOUNDRY CO. OVERCOATINGS Wco 'stock, April 9, 1890,

FARMERS! do your wife a favor and purchase one of the WORTMAN & WARD Mig. Co.'s REVOLVING BAR-REL CHURNS. This Churn has been in use over twelve years in the United States and six years in Canada, and has steadily grown in favor wherever its merits have become known. It has given more

solid and universal satisfaction than any Churn ever placed on the market. It makes more butter, and of a better quality, than the old Churns. The cream is churned by the agitation it receives from the revolution of the barrel, instead of whipping a part of it at a time with a dash or paddle, as in the old style of churns. It is washed from side to end and from end to side, and is thoroughly changed and mixed through at every revolution of the Churn.

Those who have used the Revolving Barrel Churn say their outtermilk looks poorer and thioner than when they used the old dash or paddle churns, corroberating our statement that with this principle of churning there is an increase of the quality, as well as the quantity, of the butter. As every particle of cream is subjected to the same agitation, the globules are all freed at the same time, converted into butter. and saved by a much larger percentage than by the old method. The grain of the butter is better preserved, as there are no dashers or paddles to pound or destroy the globules, thereby making the butter soft and sticky, like lard, such as is often seen in butter made in a dash or paddle churn.

Butter made with the Revolving Barrel Churn is not streaked or salvey, because the cream is all churned alike. the buttermilk thoroughly washed away while the butter is in a granular form, and is all of a uniform color and quality.

Having bought a car load of these Churns at low figures. ve offer them much below the manufacturers list price as
