WHOLE NO.—2333

Local & Foreign News

The action of the council of the board of trade at its last meeting in appointing a committee to enquire into the coast and other particulars in connection with a light drawback for the river service between this city and Woodstock has been very favorably commented on by the business men of the city. It appears that in Scotland steamers are in use which, with large cargoes, do not run much over twelve inches; that the steamers are constantly in use on rivers which in places have not as much depth of water as the most shoal sections of the St. John's river between this city and Woodstock. It is also said that the cost of such steamers is comparatively small, and that with one of them people along the river might have undertaken the service at a much less cost than at present.

The undergraduates of Cambridge, England, have taken to drinking tea after dinner instead of wine. But, though novel at first, it is the upriver sections.—*Gleaner*.

Dr. J. Wier, Dorchester, says: "Have purchased Britton's Emulsion (with cod liver oil) for my wife and myself."

The Manchester Unity, the Odd Fellowship of England, has less than 25,000 more members than the American order. The two combined number over one and a quarter million.

The promptness with which Ayer's Cherry
toral stops a hacking cough and induces re-
shing sleep is something marvelous. It never
le to give instant relief, even in the worst
es of throat and lung troubles, and is the best
medy for whooping cough.

ious to make money for the church, and several young men found their purchases added down with flutrons. One young fellow bought a little girl that ordinarily would weigh about 90 pounds, and was surprised to see the scales register 275, costing him \$5. The young man passed resolu-

condemning the girls for swindling.

Shiloh's Consumption Cure.

This is beyond question the most successful medicine we have ever sold, a few doses invariably cure the worst cases of Cough, Croup, Bronchitis, while its wonderful success in the cure of Consumption is without a parallel in the history of medicine. *Price 25¢ a bottle.*

One of the happiest men in New York

is Robert Bonner, now that he has under his stable roof the two fastest trotting horses in the world, Mamie S. and Sunolol, just in time from the Pacific coast, considered a reception every day, scores of owners of fine horses calling to see the Queen of the Turf. Mr. Bonner says that he will remain here at the stable until Spring when he will go to the coast.

The Best Life Policy.

the insurance companies' boast of. It's a better investment than any of those. It is making a few dollars in that Standard Remedy "Golden Medical Discovery," a cure for consumption, in its early stages, and all throat and lung troubles.

The wheat yield of the province of Mani-

is set down in the official bulletin just issued at over twenty-three million bushels. The bulletin states that the threshers yield actually turns out less than the official estimate, but this year it is turning out more than the smaller estimate, however. The crop is fifty per cent over that of last year. The crop of oats is estimated at nearly fifteen million bushels.

tion bushels, or rather more than fifty per cent. in excess of last year's crop. Barley has increased in about the same proportion, the total quantity being over three million bushels. The yield of potatoes is slightly under that of last year. Assuming that there are 100,000 bona fide farms under cultivation in Minnesota, the average yield per farm is:

bushels of wheat, 1,000 bushels of oats, or 200 bushels of barley, and 150 bushels of potatoes. The like of this is not to be found in any farming country in the world except perhaps portions of the north-western provinces of Canada. *Sun.*

The assertion that tobacco induces a craving for strong drink is supported by the fact that nearly every person addicted to alcohol uses it.

In the year which ended last March, Chicago spent \$40,000,000 for intoxicating liquors, and Philadelphia, \$46,000,000, so the statistics say. And yet people are hunting for the cause of the poverty and misery of the people.

Rev. John Wesley, in 1744, speaking of wine drinking, said: "You see the wine when it sparkles in the cup, and are going to drink it. I say there is poison in it, and therefore abstain from the use of it."

about stealing or committing murder. A drunken man, on the contrary, is troubled with no such scruples. Hence it is that if a person wishes to do something his conscience forbids, he first stupefies his faculties. The courage inspired by drink is responsible

begin to drink after the age of twenty-one would raise their hands. Six responded. He then asked that all who began to drink before twenty-one should raise their hands. A sea of hands were raised. By saving the boys from the saloon, we can go far to save the next generation.

Sirs, above three years ago the N. B. Railway Co. made a proposal to the Nixon's, through their engineer, Mr. Moses Burpee, that if they would give them a plot of ground thirty feet by a thousand, together with the right of way from the railroad to the

gave five dollars of it myself), remunerating the Nixon's for the land. Accordingly the company sent their agent, Mr. Hoyt, who had a deed of the land and a bond to give them the right of way to the siding, with the understanding that an agreement would

to building a good road from the main
to the siding. The Company put in a
very short switch, not half long enough to
ford piling ground for bark and other
things hauled there; and they built a plat-
form to drive on, and threw down a few loose
bark for passengers to stand on, and finally

On last Saturday I came up from Woodstock on Conductor Holt's train, and spoke the brakeman to let me off at the Nixon place, and he was perfectly willing, but the conductor positively refused to hold up for me to get off, and took me clear to Hartland, where I had to get back home on foot. I could

I have done so procure some accommodation from the Railway Company this is the way I was treated.

Yours most respectfully,
GEORGE STICKNEY,
Lower Brighton, Dec. 21, 1891.

More Good Stock.
Mr. Slipp of Lower Woodstock, who last year made and sold nearly five tons of pork, this season again will to the fore. He has six hogs of the Yorkshire type, which will

and work of Mr. Slipp's fattening ration. In addition to his swine department, Mr. Slipp keeps sixty head of horned cattle, twelve horses and a sizable flock of sheep. Among the cattle are two very fine yokes of oxen, a marling Shorthorn bull, standing 5 ft. 4 in. at the shoulder.

There is to be a convention of railway employees in New York on January 31st, is contemplated uniting in an organization the four existing orders of conductors, brakemen, engineers and fire-

This micrograph shows a cross-section of a plant stem. A large, prominent vascular bundle is visible, characterized by a cluster of large, thick-walled cells (likely sclerenchyma or collenchyma) surrounding a central area of smaller cells. The overall structure is somewhat circular or oval in shape, typical of a vascular bundle in a stem.
