work of the past year has been good. Amount of the province in the vain efforts induce people from the old country to occupy farms which unbappily are vacant in some sections of the Province, because in our judgment, if the patives of the Province are obliged to leave home for want of rememerative employment, no amount of expenditative under pretence of encouraging immigation will keep the people with us whom we might bring from abroad. Remunerative employment and better markets are what we believe the farmers and first laborers of the country require, and it it is within the power of the Provincial Government and legislatary to do anything in this direction, as I believe it is, it must be done along the same or similar lines as those upon which the present Provincial Government has been moving. We have formed the opinion that to establish butter and cheese factories upon a profitable basis in this Province a great daily Province, as it is admittedly in all respects well adapted for becoming, and to accomplish this the Government wil do its part leaving it to the people to do theirs.

electorate which is willing to see fair play even in political warfare.

In making our appeal as a Government for a renewal of public confidence, we do not rest our claims altogether or even largely upon the successful accomplishment of what many doubted our ability and intention to effect. The difficulties in the way of setting the legislative council saids were many and serious as we always realized they would be, and nothing but a steady and sincere devotion to our avowed policy enabled us to compase the undertaking; but we do feel that our having triumphantly accomplished this great reform gives us a strong title to your continued confidence.

A glance at the record of the Government over the whole field of legislative and admintrative action will show that we have endeavored to deal in an hoasest, vigorous and progressive spirit with all public questions. Judged upon our merits and making reasonable allowance for errors of judgment, we think it cannot be gainsaid that this Government has done good work.

Without attempting to enumerate in detail the many subjects which have received attention at our hands, I may mention one of commanding importance to which we have devoted our best energies, I allude to the promotion of the agricultural interests of the country. The welfare and progressite barries has the deal that confidence of the greatest of all our industrial normality has the

that some benefit would accrue to our farming population therefrom, we have permitted and encouraged the organization of associations in greatly increased numbers and added to the grants in aid of farmers exhibitions. We have made large horse, cattle and other stock importations and we have already stimulated the dairy industry on a large scale, but our work in this direction has only been begun, compared with what the Government has in contemplation, if it be your will that we continue the work.

We have not, it may be admitted wasted to our farming population therefrom, we have permitted and encouraged the organization of association as all day crowded the meeting house so that overflow services had to be held.

The Woman's Missionary meetings, presided over by Mrs. G. A. Hartley, was one of great interest. Miss Hooper, the returned missionary, was most cordially received, and delivered a most interesting address. Mrs. T. H. Siddall, of Nova Scotia, spoke of the work being done in that Province.
