### Communicated,

ton with a very encouraging report as to progress in the Indian exhibit. She made Hardy Cherries. To Nurserymen and Fruit Growers An important reature in connection with the Horticultural work, during the past five years at the Central Experimental Farm, Ottawa, has been the testing of hardy forms of the Morello Cherry, recently imported from Eastern Europe. A number of these low growing, partially dwarfed varieties have been in bearing the past two years and give evidence of unusual hardiness, vigor and productiveness. This apparent hardiness of tree direct presentation of their life and customs, the beauty and variety of the and customs, the beauty and variety of the archive fairly revel in grewsome sights to their hearts satisfaction. This place is in a small, square, two story brick structure at the rear end of the county hospital. They call it the county morgue. And the dead bodies that are piled up in cord-wood fashion are the reductiveness. An important f-ature in connection with dence of unusual hardiness, vigor and productiveness. This apparent hardiness of tree united in many instances with good quality of fruit, renders it advisable that they should be disseminated at as early a date as possible, especially in the interests of the fruit growers in the colder parts of the Dominion.

In order that Nurserymen and Fruit Growers may have an opportunity of testing them without delay, a selection including the most desirable varieties has been made, of which buds for immediate propagation are now available, and will be distributed under instruction of the Hon. The Minister of Agri-

struction of the Hon. The Minister of Agriculture free of charge, on receipt of the application by the undersigned.

Applications should be addressed to the Hon. The Bust of the Queen upon which the Horizone should be addressed to the Honzulturan, Central Experimental form with they are received, as far as with her Majesty's consent, promised to send to Order in which they are received, as far as more of the Ruyal Family. The Princess heads for the various sections.

Care should be taken to preserve the names, so that a record of the behaviour of each artisty can be secured for the purpose of future comparison. Mahaleh, is probably at preent the best available stock upon which to work these buds. In the absence of this they may be set upon stocks of Mazzard, Bird Cherry, (Pranus Pennsylvanica) or the Common Red Cherry, with a fair degree of success.

Benton, New Brunswick. BLANKS Of allkinde can be had at ton-

5 CTS. PER LB. town. To-day it has an honored place in every city and country store, possesses one of the largest manufacturing plants in the country and sells everywhere. Why is this? The reason is as simple as a child's thought. It is honest, does one thing, and does it right along-it cures Dyspepsia. G. G. GREEN, Sole Man'fr, Woodbury, N.J.
