Our Queen and Constitution.

WOODSTOCK, N. B., SATURDAY, SEPTEMBER 17, 1892.

And in the world's gay pleasures had no part.

My soul was wearied with the bitter strife; Suddenly, through the Inloved, unknown, I wandered thro' life's mart, and rain, I saw, looming right before us, Through gloomy parts with many a sorrow the gigantic figure of a woman wrapped in a long, black mantle, which seemed to flutter in the wind. She waved great spectral arms about in swift, twisting Without one ray of sunshine breaking thro', movements. As I sat, looking in horror the figure vanished with a final wave of When, glancing up, I met your gaze so true; Then all the dreary night was changed to day, And I rejuiced, dear heart, because I knew of her arms. I was too much astonished and stupe-

showed that the road was clear as far as

our next stopping place. On we went.

The darkness grew more intense, if

possible, while the wind shrieked by.

The rain became more blinding, till noth-

> Aubrey Murray is an English military looking gentleman who is now on a visit to St. Louis. He has recently obtained some notoriety from his connection with the Gladys Evelyn case. He was right in the midst of all the frenzied excitement of the Indian cholera scourge of 1877 and madden ing suffering of the epidemic, and refers to them with a shudder. He said recently to a Globe Democrat reporter:—
>
> "Perhaps the strangest and most income the region of the great building, which, and refers to the centre of the great building, which, and refers to the centre of the great building, which, and refers to the centre of the great building, which, Globe Democrat reporter:—
>
> "Perhaps the strangest and most inexplicable peculiarity of the rayages of Asiatic feet, are to be two great platforms, one at plicable peculiarity of the rayages of Asiatic cholera is its marked capriciousness. I was in the city of Peshawar when it was raging there, and I saw an entire side of a street literally devastated, while the other side enjoyed the most perfect immunity. I have also known it to enter a barracks and claim for its victims the occupants of one entire row of cots, while soldiers sleeping not ten feet away would be entirely unaffected. During my stay in Peshawar I witnessed as many as 1.500 deaths a day from the scourge.

many as 1,500 deaths a day from the scourge. main floor.
Of course, there was neither the time nor Of course, there was neither the time nor labor to give each of these victims a separate burial. So we did the next best thing.

Close to the city the blazing sun had burned and parched the earth until there was made in the ground a great crack fully 300 feet long by 50 feet deep. Into this huge crevice we poured a torrent of slack lime that came to within twenty feet of the top. Into this seething caldron we tossed the thousands of cholera victims, and on top of each day's consignment of victims we poured a particle of sickening stench from the decaying human flesh. I saw the same thing done at the cities of Scinde and Delhi, and in all I must have seen 50,000 natives who died

I must have seen 50,000 natives who died from cholera buried in the manner described. The only difference was that at the latter two places prodigious trenches had to be dug, the sun's fierce rays having failed to the heat quality and the total wheat wield.

dug, the sun's fierce rays having failed to provide the yawning gap in the earth.

That the Asiatic cholera—which, by the way, is indigenous to India, and ought to be named for that country—is the most fatal of all varieties of the malady is generally known; but the suddenness of death in its path doesn't seem to be generally known. It usually runs its course in an hour. It seldom ever lasts longer than three.
