WHAT PHYSICIANS SAY.

ENDORSED BY A Graduate of Edinboro'. A. DEW. BARSS, A.M., M.D., Edin., a man of culture and refinement, is Lecturer on Physiology and Hygiene in Acadia College; Nova Scotia. Of SKODA'S REMEDIES he says:—

"I have carefully examined the formulæ from which they are constructed, and find they have been judiciously selected, and are well adapted, for the accomplishment of the various ends desired. I believe the ingredients used, the BEST of their kind, and the REMEDIES should have a large sale, when placed before the general public."

The late Dr. F. A. Roberts, a leading Homoopathic Physician of Maine, said: "No Remedies upon the market equal SKODA'S, in neatness and elegance of appearance. I believe Skoda's German Dintment and Skoda's German Soap, are the most perfect remedies with which I am acquainted, for the cure of all Skin Diseases. I do not hesitate to recommend them as such." CALIFORNIA.

Brief and Conscise.

The population of California in 1850 was 92.000, to day it is 1,500,000, a percentage of increase of which few countries can boset. Of this total there are 75,000 Chinese, 11,000 Negroes, 12,000 Japanese, 12,000 Indiana and Jmany Portugese, Germans, Italiana Dutch, Swedce, Spanish, etc., etc. The heterogeneousnese of the population is attributed to the great gold excitement in 1848 9 which brought people from all parts of the earth, many of whom remained in California after the furore had been brought to a close. The organic law of the State is similar to New York and other Eastern States. Elections are biennial. A plurality is sufficient to elect. The assembly has 80 and the senate 40 members who are paid \$10 per day for essions limited to 120 days. The legislature meets biennially at Sacramento. The voters are white and black. Chinamen and Indiana cannot vote. The Governor receives a salery of \$7,000 per annum. He cannot vote are white and black. Chinamen and Indiana count of this fact and a remarkable instance of legislative spontaneous combustion the city of Sacramento is without doubt to loce the bonor of being the State capital. Only lest of Sacramento is without doubt to lose the honor of being the State capital. Only last week when the legislative session for 1893 was in the last throse of death some facetions member, in revenge for an article published in the Sacramento Bee, showing up the mid night frivolity of some of the honorable members, moved that the State capital be removed to the city of San Jose. The question was passed by the assemby and hustled into the cenate where it also received a two thirds vote, the most of the members treating the cremento is without doubt to lose the New Almaden, 15 miles south of San Jose,

pose of the market equal incess and elegames of the market equal incess and elegames of the member the state of the state of the member that the construction of the construction of the member that the construction of the const

continental railroad into Central California, and consequently are a monopoly doing about as they please. What with exorbitant frieight rates, excessive passenger tariff, refusal to pay taxes and want of courtesy to the public, the people have just cause for complaint. The prosperity of San Francisco and therefore the whole State is seriously handi capped for want of better railway facilities. It is to be hoped that eastern capitalists will come to the rescue and open up a large portion of the country that remaine dormant for this one reason. The first railway in California was constructed in 1854 from Sacramento to Folsom, 22 miles. The total mile ge to day is over 5,000.

The public rates of California, and constructed in 1854 from Sacramento to Folsom, 22 miles. The total mile ge to day is over 5,000.

mileage to day is over 5,000.

The public echool system of Cal. is strictly speaking, not so good as N. B. and some of the Eastern States, but it is being gradually improved. Separate schools are provided for Indians and nagroes. A compulsory educational law is now being agitated and will probably soon receive legislative attention.

Take this class, it won't hurt you. It has a very fine flavor; it will be an appetizer.

in the production of Bee's honey, fruit and barley as well as gold; is the only raisin producing state; has the most complete horsebreeding establishments in America; la producing state; has the most complete borsebreeding establishments in America; is practically out of debt and has the largest per capita wealth of any of the United in Ano; Itching or turn. The relief is certain, and Ulceration and and most influential newspapers of any state in the Usion. There are 88 dallies and about a the wheel, and unequaled, and most influential newspapers of any state in the Usion. There are 88 dallies and about 450 periodicals, weekly, semi-weekly, tribular and unequaled. The relief is instant ul and unequaled, oncr. Ulcers, Fistulas, truptions, Chafing or fallible.

The Chinese element in California is large as indicated by the figures given elsewhere. They are engaged in every trade and cocupation and all manner of businese, the intemperate and occupation and all manner of businese, the majority of them are peaceable, industrial williams is, any year.

California is essentially a mining country. It still ranks second in the Union in the

value of mineral products which in 1891 amounted to 100 millions of dollars. The total amount of gold produced since 1848 is estimated at \$1,500,000,000. Gold was first discovered near Coloma in the foot hills of

the Sierras. There are three systems of min-

ing. Placer was the primitive mode. It conciets in loosening the gravel with picks and then putting into pans and rockers, when shaking and draining the gold particles fall to the bottom and are gathered by means of quickeilver. Hydraulic mining is simply the substitution of water for the pick and the

shovel. The water is brought from a stream

or recevoir in a pipe large in Groumference at the further end but growing gradually smaller the nozzle being but a few moches in

tional law is now being agitated and will probably soon receive legislative attention. There are over 4500 schools including 24 high schools which are maintained at an annual cost of \$5,000,000. This does not include appropriations for the three Normal Schools at L73 Augeles, San J300 and Ohico, nor the State University a description of which will appear later, together with the far famed University of Palo Alto whereby a father perpetuates the memory of his son. School property is valued at 14 millions of dellare. The system of teaching and the manner of conducting the schools are quite and blind is part of the public school system and several orphan asylume are under the control of the department of education. Theye are about fifteen denominational colleges and acadamics. The home for feeble minded children, in Sonoma Oo. and the Soldisrs H. me at Santo Monica, a see recorts cost L. & Augeles, are large and important institutions. There are two state prisons at San Quentin and Folsom containing 2350 prisonsers.
