ing for themselves and families comfortable homes, schools and churches, where many of our native born sons would fail to eke out a

My next meeting was held at Kilburns on the main river, this place being thickly set-tled turned out in large numbers to the meet-

If possessing the natural advantages for growing a variety of grasses and fodder plants, the means for starting in the dairy business and the facilities for shipping these products, is any guarantee, I should say that these people would launch out in co-operative dairy farming at once, but no doubt as in other places where the dairy business has become established through the education of the farmers, it will require some little time.

The present state of the roads may suit those wicked enough to stand on slippery places, but it is rather tottleish for good people and for horses not sharply shod.

Some more lumbering parties went up river this week to work for Hale. This is naddition to the large number already reported, but probably we have now reached the end of the list.

finished product in the shape of butter, cheese, pork, beef and poultry. Coming down the river we called at Up-per Kent, a beautiful stretch of land, suitable

C. E. Puttner, Esq., Ph. M.:

Sir,—I consider it my duty, not only to yourself, but to my fellow creatures who are suffering from Asthma and Bronchitis, as I had for some time previous to using your "Enulsion of Cod Liver Oil with Hypophosphites," to give my testimony to the most wonderful good effect it had. Having suffered for some time with Asthma and Bronchitis, accompanied with great nervous exhaustion, and having carefully read your Essay or a sometime of considerable in the soil, without returning much in the shape of bottles I began to receive great benefit and relief, and after using three bottles I was completely revived and am to-day perfectly free from either Asthma or Bronchitis, and my nervous system much invigorated and built up. I have found it very pleasant and palatable, and with no taste of oil whatever, and can with great confidence recommend it to those suffering as I did previous to taking your compound. I am, yours, &c.

pusiderable interest in mifested, showing a agricty as to the price of coal in winter I wish through your paper to give the fol disposition on the part of a number present Many of them, are now, as opportunity offers, lowing report of dairy work performed under to fall in line with the work recommended. attending to the supply of firewood, which, I next held a meeting at Bath, a thriving being generally obtainable on their own ure of New Brunswick in the above named village on the railway line, at which a number farms, render them independent of mines and counties. After attending the Exhibition at of the leading men of the place seemed anx combines, of stockholders and retailers. Woodstock and rendering such assistance as jous to gain information in reference to the was required of me, I made arrangements for cost of a cheese factory and other matters in

been, partly owing to the darkness of the night and the muddy roads, and partly, no doubt, to the lack of interest taken by some people in anything that is of an educational nature, yet those present were well pleased with the work performed, and expressed regret that the whole co umunity had not availed themsalves of the opportunity to gain practical information.

I next hald a meeting in the new and com modious hall at East Florenceville, one of the "gardens' of Carleton county, and, although the night was unfavorable the meeting was largely attended, by farmers, their wives and daughters, the latter being a sure indication that the community is improving in the quality of the butter produced. Some of the farmers here are moving in the right direction. A Mr. Smalley has rected a good silo, built after the descripion published a few months ago in the Fam ily Herald by your correspondent; and other indications of growth in the dairy business are quite apparent. Now that the prejudice against agricultural education is largely re-

be more thickly settled, which no doubt, it soon will be when this place will become a splendid locality for co-operative dairy work. At present private dairying is carried on to some extent, but the prices realized here for butter is not quite satisfactory, there being no market near at hand. This difficulty can be overcome by placing the dairy products, of a more uniform quality, upon the outside marovercome by placing the dairy products, of a more uniform quality, upon the outside market, through co operation. The people are intelligent and enterprising, and will loose no time in availing themselves of the above privileges.

I next visited Arthurette, another good settlement for dairy farming, situate on the Tobique river. Hay and oats are grown here to a considerable extent and supplied to the lumbermen for feeding their Lorses; the few cows kept largely depend upon straw as a winter food, consequently very little winter dairying is carried on, and the cows are often in poor condition for milking in the summer how to set the milk and ripen the cream in

In fact this state of affairs prevails to a great extent in all this part of the province, and if persisted in for a few years longer, will tend to reduce the value of the land, and eventually lead to the abandonment of the farms, after their natural fertility has been sold off in the shape of hay and oats. There are two or three other localities on the Tobi one river admirably adapted for covenerative to deliver lectures and give practical lessons by sending a fully equipped travelling dairy into every school district, with instructions to deliver lectures and give practical lessons in dairy work in all the schools in the province. I desire in my own behalf, and in behalf of the department for which I have been working, to thank all those that I met at the different places visited, for the assist-ance rendered, and the kindness shown, and for the good order observed and the appre-

ciation of the work performed at all of the I also thank the commissioner and secre-

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxativo; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowe's without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Cc. only, whose name is printed on ever package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.
