John E Stewars, the well known railway contractor, is making it decidedly interesting for the Tobique Valley Railway directors. He says his name was forged to the returns ectors. The difficulty, as he states it, is that sometime since he had a quarrel with the directors because the annual statement of exnenditure submitted at the annual meeting contained about \$10,000 more than had act ually been expended and he would not sign his name to the returns and resigned. finds his name signed to the return and will act against the directors for forgery. Stewart is a pretty determined man and these connected with the crime will find they have run against the wrong person. When those very close to the parliamentary heads of Canada are charged with forgery it is time that the people began to bestir themselves.
