A good Shoe differs from its wearer in that it should always be properly "on its uppers."

How it gets there, has everything to do with the comfort it brings to the foot. Putting soles on their uppers is hardly a spiritual work, but it's the big end of Shoe making. There are three ways of doing it-by the use of pegs, Mackay

stitching, and the Goodyear welt or hand sewn process (Slater method). Pegged or Mackay stitched shoes are known from the other make by their putting welts on the sole of the foot instead of

having them put on the sole of the shoe. They do this, because the pegs, or stitching, go clear through the sole, under the foot, where the full weight of the body, pressing upon the surrounding leather, raises hard lumps around every peg

or stitch, and these in turn raise painful callosities, and corny spots on the foot. The soles of the Slater Shoes, are sewn to the welt (or strip of leather which projects beyond the sides of the shoe), away from the foot, leaving a smooth and pliant surface under the foot while

retaining all the elasticity and springiness of the sole leather. This is the Goodyear welted or hand made method, and these "best in the land" shoes are stamped on the soles at "\$3.00 per pair." Other facts about feet you'll find in a little book "The Sick Man of Leatherhouse" Ask for a free copy from

mother has, in her management of home af-fairs, many trials and tribulations. These trials and troubles are very frequently increased when the mother or daugh ter makes use of some of the many deceptive and worthless package dyes put up for home

dyeing.

Merchants who sell such dyes are certainly deserving of public censure and condemna-tion. The women of Canada who use dyes with the view of economising should never be deceived; it is cruel and heartless to do so. However, the case is plain to those who know; the greedy dealer thinks more of his big profits than he does about the welfare and happiness of his best customers. deserving of public censure and condemna-

All troubles and losses in home dyeing are avoided when the Diamond Dyes are used.—
By their use, work is well and quickly done; results are perfectly satisfactory, as the colors are at all times bright, clear, brilliant and fast. In order to guard against all future trouble, you must watch the merchant who recommends the something just as good as Diamond Dyes. Tell him plainly that no other dyes are as good as the "Diamond."—
Take only the "Diamond," and your work will be done easily and well.

Mrs. McIntosh's remains were consigned to the grave in Glassville cemetery on Thursday, the 15th, in the presence of a large crowd of mourners—Rev. J. K. him up for trial.

Hon John Costigan came up Tobique on Wednesday, en route for Trowser Lake, for an outing. Mr Costigan is said to be an expert trapper, and often amuses himself in this way. A few years ago he spent some weeks in the woods up river, during which time he shot a large moose. He took the hide to Ottawa, had it tanned and made into a pair of mocoasins, which he sent to Victoria county to one of his constituents. It is fair to assume that of his constituents. There was a large attendance at the Anniversary entertainment of Florenceville Council on the 10th inst. A very full and interesting programme had been prepared by the efficient committee, consisting of vocal and instrumental music, including a solo by Miss E-tabrooks and a chorus from the choir, specches and recitations. Grand Secretary McFarlane was present and spoke practically. The economic aspect of the prohibition movement was vigorously dealt with by J K Flemming and Rev Mr Ives. Other phases were treated by Revds J E Flewelling and A H Hayward and Bro McIsaac of Hartland. The meeting was one of the best we have had in Florenceville. When Rebellious and Out of H Order Paine's Celery Compound is Your Only Hope.

It Brings Comfort, Happiness and Health.

Too few recognize the fact that the stomach is the chief organ of the body. When this great and guiding organ is out of order, every other organ depending on it for nour-ishment is affected by sympathy. So long as digestion is properly performed, and healthy fluids secreted from the food, the body is nourished. When the stomach is inactive the system is impoverished, and disease rapidly develops.

If your stomach is rebellious and out of gear, be assured your whole system will soon give evidence of trouble, and your life will
