As a class it reflected credit on Carriage horses, nine or ten coming out to contest for the prizes. the city. Has every accommodation. Electric awards being determined on conformation, Cars, from all parts of the Town, pass the house action and trueness of gate. In the class far draught and general pur-pose pairs the finest horses I have seen this year were brought out. While some were heavy and necessarily slow in action, the

majority were trappy, prompt and very pleasing, one pair of grays being especially quick in action, and one pair of light bays out of part blood Olyde mares were almost an ideal pair for a carriage or coupe. What was lacking was the evidence of breeding along the lines indicated by the demands of to day—that of high class, good sized roadsters. To this, farmers owning good brood mares may well give attention, for it is to be the profitable line of the future.

The cattle show was larger, but in it were a number of grades not calling for special The Ayrshire class carried a few extra good cows, showing good care and management on the part of the owner.

The Holsteins were larger in number and of large size and beefy in type.

The Shorthorns were of good size, but deficient in milking qualities, the young stock being equal to or better than the mature. The Jerseys were out in force, and in this class were found some remarkably fine ani-

class were found some remarkably fine animals, the bulls being large, well developed and of good quality, the cows giving evidence of good breeding, high quality of milk and fairly good, many of them excellent, lacking chiefly in the development of the fore udder.

This criticism would hold against nearly

Classes for grade dairy cows and helfers.

Discourage, in every way possible, the use of grade males, for, if good, they are accidents and not able to reproduce their own virtues.

Grade up by breeding up, using always pure bred males of merit.

If you will examine the bony structure of this leaves you will find it like. ness of brisket. Perhaps the one Jersey to dairy cow can hardly be expected.

superior, and the numbers may well be increased, with profit to the province, care always being taken to perserve type and avoid any evidence of beefy tendencies. In the grade classes some good cows were found, but the standard of quality with the young stock was below what it should be and attention should be directed towards the selection of better breeding animals. It cannot be doubted that the policy of continuing prizes on general purpose classes and grade males is working injury to the province and the is working injury to the province and the agricultural exhibitions. Under present market conditions there can be no combin-wall thick; evidence of constitution good

ation of beef and dairy types with profit to and, in spite of the cuts made for want of the grower, and the same applies with equal ideal conditions, the score is high, simply force to the draft and driving horse. If beef making is to claim attention, as it should, it | mal. must be through the use of sires and dams | Bearing in mind what has already been distinctively of the beef type, thereby with good breeding insuring a weight of 1300 lbs. breed, add to it that structure governs puring 30 months, which would indicate profitable work for the grower.

yielding less than 2100 qts. milk and making at least 200 lbs. butter per year, and to limit of production. ON THE FIELD. AN OBJECT LESSON FOR TO-DAY.

object lesson, using for illustration John Connor's Jersey cow. The Doctor said:—
The lesson of the hour is that of special purpose. The one thought to strike from the mind is that growing out of the conditions of other days, that a combined general purpose animal was the ideal animal for the farmer. What was good practise a quarter solve the energies which make milk.

Open your barns to the sunshine and purp air. You cannot make good butter while the cows get air and sunshine only through the scuttles where the dressing is thrown out. Purp air, sunshine in abundance, cleau tie-ups, purp water, sound grain and good hay, will enable cows hitherto of little to prove their desire to outpour for

A sad mistake is being made in clinging to thoroughbreds simply because they are declared such and were imported. There must be evidence of individual merit, backed by blood inheritance, coupled with promise of prepotency along the line of greatest profit Head small and lean; face dished, to-day. Men must therefore be reconstructed, and the gospel of dairy salvation preached everywhere. Off against this type must be set the squarely built, blocky, short neck-Chapel Street, - - - Woodstock. ed, thick shouldered, heavy brisket, full, square quarters, and broad, flat, straight back and belly of the beef cow.

> twenty-one hundred quarts or two hundred Hips wide apart; rump long, Blend these types and you have the general purpose cow, a general curse to her owner. Right here is where the score card comes in to awaken men to the worth of color and mellowness of hide; inside of care rollors. parts and the relations they bear to each other, also their effect upon the animal as a whole. Remembering that "we come into the world a bundle of susceptibilities but that we very soon become a bunch of iron the behind, the behind the behind, the behind the behind, the behind th habits," and that, in this respect, animals Teats rather large, wide apart, and are like men, the importance of appreciating these susceptibilities becomes an absolute Milk veins prominent, necessity if dollars are to be coined from the tie ups and pastures. Our object lesson today is a grand model of a dairy cow. I have selected an extreme, because it is with extense promittent,

vidually, as the animal before us-Mr Connor's Jersey. The object of an Exhibition like this is not to distribute money, but encourage improvement, and for this reason every premium for grade males should be stricken out and all prizes for general purpose stock, opening new classes for grade dairy cows and heifers.

This criticism would hold against nearly every cow in the field, excepting some of the Ayrshires and a few of the grades, and in breeding it is a point that may well be given attention, that the parts may be better balanced in the next generation. One Jersey cow owned by Mr. John Connors was almost an ideal model for a dairy cow, excepting in the part already noted, the score being in the part already noted, the score beseveral very fine animals; there was, however, some of the evidence of beefy type among them, manifesting itself in thickness of shoulder, roundness of quarter and heaviness of brisket. Perhaps the one Jersey to

which most attention was given was a yearling heifer owned by President C.L.S. Raymond, one carrying the dairy form to a remarkable degree, and an udder and teat development promising heavy production at the

You have a reputation for the one, make it for the other, and, in the making, keep no cow which does not yield a net income over and above the cost of the raw product out of which she gathers the food of support and On Friday, the 8th, Dr Twitchell gave an stores the energies which make milk.

farmer. What was good practise a quarter value to prove their desire to outpour for of a century ago has become evil to-day, for the reason that demands and controlling conditions have so radically changed. To-day the best general purpose animal is the best the best general purpose animal is the best the best the best determined by the conditions have so radically changed. To-day and let business methods present themselves at every turn and be manifest at every step. special purpose, because the increased pro-duction coming from special fitness increased resolve each year to improve the quality of your exhibits. Doing this you will find the In approaching a study of the dairy cow all other considerations must be blotted out and she is to be measured from a dairy standpoint. Bear in mind that this admits nothing which savors of beef, because the two temperaments are as distinct as black and white. The first step, then, in the direction of success in breeding or feeding the dairy cow, is a clear-cut conception of dairy type, Here type becomes paramount to be divided by our exhibits. Doing this you will find the open door leading to better agricultural conditions, larger crops, herds and flocks, and the future of Carleton Co. will be assured. Failing, you must not complain if the enterprising boys and girls seek elsewhere the opportunity to prove larger faith by greater works. This is the less of the hour, read it well, for it touches the home, the heart and pocketbook of every farmer.

Following is the score card giving score of Mr. Connor's cow:

hibit of both stocks.

Among the sheep we found a pair of especially fine Cotswold ewes, but the other entries did not seem to us sufficiently true to type to compete, so only 1st prize was awarded. In the ewe lambs of this breed the only pair shown were awarded 2nd prize.

In Leicester rams of any age, only 2nd prize was awarded, as the animal was poorly woolled and rather coarse. In yearing Leicester rams, the quality was good, but there were no pure breds of other classes shown.

In Shropshires there was close competition in all classes, and some very good animals were shown. In making awards, we found it necessary to stick pretty closely to what we considered the best distinguishing type, and the prizes consequently seemed to run largely towards one flock,

In grade sheep we found a pair of especially fine of the other classes. In grade sheep we found large and fine tive Land."

Mr. Carter was called on for an address, in the course of which he humorously described his ineffectual efforts to construct a time table for a miscellaneous school of 8 or 9 grades.

Dr. Inch expressed his very great pleasure at being present. Apart from its educational interest the trip up the river was a decided pleasure. He was pleased at the interest displayed in the matter of education, as manifested by the presence of such large numbers; and very glad that the period of indifference was passing away. Opposition was better than indifference, because it showed energy and interest. The doctor complimental the prizes consequently seemed to run largely towards one flock,

classes, particularly among the grade and ewe lambs. If, without being considered im pertinent, we might make a suggestion it would be that in our opinion a grade sire is

BLANKS Of all kinds can be had at the Sentinel Office, cheap. Victoria Co. Teachers Institute.

The teachers of Victoria county met in annual session at Andover, on the 8th inst. The first session was taken up with the en-rolment, election of officers and a paper on Algebra by C. H. Elliot, A. B., of the An-dover Grammar School

Thos. Rogers was elected President, Mass Bessie Scott, Vice-Pres.; U. H, Elliot. Sec-Treas., with J. L. White and Miss Pheobe Emack as additional members of the Executive committee. Twenty-five members were enrolled, but your correspondent did not get a list of them. In the afternoon, Miss Fletcher read a paper on Deportment. A very general discussion followed this paper. The difficulty of getting teachers to prepare a paper for the institute was spoken of by Mr. Elliot, and on the suggestion of Mr. Meagher it was decided to ask the teachers present to express an opinion on the best subjects for next institute. A variety of subjects was

dial greeting.

In the evening a public meeting was held in Beveridge's Hall, presided over by President Rogers. In opening the meeting Mr. Rogers referred to the late visit of the Csar and Czarina to Great Britain, and then played the Russian National Anthem. On the platform were Dr. J. R. Inch, A. J. Beveridge, M.P.P., J. E. Porter, M.P.P., T. J. Carter, LL B., Thos. Lawson, S. P. Waite and Inspector F. B. Meagher. A choir sang in good form, a song entitled "My Own Native Land."

In grade sheep we found large and fine new school building. A good word was said

not worthy of encouragement, as no sure results can be got from his use and therefore if by an Exhibition we hope to raise the standard of stock, the giving of prizes to on ly pure bred males, would be a move in the right direction.

and taxation in Victoria county were given.

The expenditure for education in Victoria county is annually about \$11,000. About \$7,000 of this amount is contributed by Provincial and county allowances. Over half the school districts in the county have a right direction. taxable valuation of less than \$12,000; some In the class of grade ewes we found it very os them as low as \$4,000 or \$5,000. An difficult to satisfy ourselves as to the best account of the bill presented to the Legis-

Waite and Rev. A. Gratz. The speaking was interspersed with music of a high order. The meeting closed by singing the National The first session on Friday opened at 9

a. m. As Dr. Inch had to go down on the train at 1.55 p. m., and could not be present at the afternoon session, the question box was the first thing taken up. A number of questions were asked, and all were satisfactorily answered by the Chief Superintendent Miss Mabel Barker read a paper on Nature Lessons, which was very favorably considered by the Institute. Then followed a paper by President Rogers on "Ocean Currents."
Let me say right here, that Mr. Rogers' papers are, in the writer's humble opinion, the papers of the Institute. In former institutes Mr Rogers has had good papers, but the last was the best. In Canada we have a cold The English language is spoken by only about 125,000,000 persons, while the Chinese is spoken by over 400,000,000. ally. One cause of cean currents i. e. heat, Almost all the ills of life arise from wrong action of the stomach, liver and bowels, therefore wisdom is shown by using Buriock Blood Bitters to regulate, strengthen and purify these organs, thus preventing and curing all diseases from a common pimple to the worst scrofulous curately known in the oceans as rivers are in

A thousand miners are killed and more than 100,000 injured every year. Since 1851 was read by Miss Bessie Scott. Corporeal 48.219 miners have been killed and 4,500,000 punishment should be reserved for extreme injured. These statistics have just been issued by the British Government in connection with the laws for the additional protection of those who labor in the mines which they are endeavoring to get enacted by Parliament.
