Poetry.

October.

Chill October,
Grey and sober,
Sullen, gloomy, dull and sad;
Leaves a-falling,
North winds calling,
Naught to make our spirits glad.

Yet we love thee,
Chill October,
For the joys thou dost presage:
Skates a-ringing,
Clear as singing
Birds that in the bowers engage.

Steeds a-prancing,
Hearts a-dancing
When we glide across the snow;
Or careering,
Nothing fearing,
On the swift toboggan go.

So we love thee,
Dull October,
But not for thyself, ah, no!
Dark and gloomy
We but hail thee
As the Herald of the Snow.

—*Toque.*

October 16, 1896.

FLORENCEVILLE DAIRY ASSOCIATION.

AGRICULTURAL MEETING REPORT.

Florenceville, Oct. 27, 1896.

Perhaps the largest and most enthusiastic agricultural meeting ever held in this place was held last evening, under the auspices of the Dairy Association, with President Taylor in the chair. The speakers of the evening were Messrs. Mitchell and Tilley, of the Local Government Travelling Dairy, and Mr. W. S. Tompkins, President of the Farmers' and Dairymen's Association. Mr. Mitchell took up the subjects of Selection, Breeding and Feeding. These subjects were handled in a masterly manner by the speaker, showing that he had acquired thorough knowledge of the work through careful study, as well as practical experience.

In taking up the question of Selection he pointed out the necessity of farmers making a careful study of the distinction between the beef and dairy type, and clearly showed them that a cross between the two would be a curse to all farmers who persisted in breeding the general purpose animal, and that if farmers intended to work at dairying, along with their farm work, they would have to breed nothing but dairy animals if they intended to make a success of the industry. The testing of each individual cow, he said, was an important factor in the dairy business, and by so doing they would know just what each cow was doing, and any not meeting a certain standard should be sold to the butchers. He pointed out the fact that after the farmers knew what each cow was doing, they would be in a position to do some intelligent breeding, and as the male was half of the herd, a few extra dollars would be well expended in securing a good one.

The feeding question, he said, was a very important one, and the greatest care in breeding and selection would be useless unless the animals were properly fed. From experience he had found that rich, succulent food should be provided for dairy cows when the pastures fail. Peas and oats for summer and fall feeding, and corn ensilage in winter would give good results, and to dairy for profit these points would necessarily be considered.

Mr. Tompkins gave an excellent address, taking as his subject: The system of farming that is being followed and the system that should be adopted. The speaker being a farmer in the Province handled the subject from the standpoint of a practical farmer, basing his argument on what he has learned from his own farm work and careful study. He pointed out the great mistake the farmers of Carleton County were making by selling their crops off the farms in a raw state. Oats at twenty cents per bushel and hay at nine dollars per ton, selling the virginity and fertility of their farms and putting nothing back to replace it. The future of this system would certainly prove disastrous to the farmers. The speaker advised the manufacturing of all crops grown on the farm into a finished article of food, in the form of cheese, butter, pork, beef, mutton and poultry, thereby giving employment to the farmer twelve months in the year at a remunerative wage, and at the same time keeping up the fertility of the soil. Mr. Tompkins spoke of the thousands of non-producers that the farmers had to provide food for and that it should be the aim of every farmer to produce the food required of the finest quality at the least possible cost. To do this successfully the farmers must make a careful study of every detail in connection with their farm work, especially economic production; the most effective way to bring this about is through the channel of an association, by farmers meeting together often and discussing matters regarding their own business. He spoke of grand work being accomplished by the Provincial Dairy Association and the knowledge disseminated through the efforts of this organization; also of the good work being done by some of the Local Dairy Associations throughout the Province, and urged upon the farmers of this district the necessity of holding regular meetings. Our governments, both Local and Federal, were doing all within their power to facilitate agriculture. We, the parties interested, should place ourselves in a position to participate in the benefits derived therefrom.

He spoke of the many valuable points he had got by attending the annual meetings of the Association, and advised the farmers of this district to send a strong delegation to our next session in Fredericton this winter.

He spoke of the many advantages he had derived from a careful study of the poultry business; he has been giving this department a fair trial, and finds that by breeding pure bred fowls and feeding properly he could find a ready market for the fowls and their products at a good profit.

We would just say that Messrs. Tompkins and McCain made a personal canvass of the district a short time ago, and it was largely through their efforts that the organization was again re-organized.

Mr. J. F. Tilley, who had been engaged in churning during the time taken up by the other speakers, now took the platform; he being a Carleton Co. boy and the first to take a course at the Ontario Agricultural College at Guelph, his coming to the platform brought enthusiastic cheers from the audience.

Mr. Tilley took up the subject of Milk and Cream and its requirements in order to secure a superior quality of butter and cheese. Its cleanliness was an important factor in the preparation of good butter. Mr. Tilley emphasized the necessity of keeping a milking herd in a clean stable, exercising care in brushing before being milked. The utensils used in preparing and ripening the cream should be thoroughly clean, so that no development of bacteria would occur. He explained the absolute necessity of having a thermometer in the dairy, but no cast iron rule could be made for a churning temperature, as different temperatures were required for different lots of cream, and the only way for butter makers to overcome this difficulty was to make one churning be a guide for the next.

As soon as the butter reached the granular stage, churning should be stopped, the butter should then be washed with water at a temperature 15 or 20 degrees less than the churning temperature. The working of butter should receive great care, for while the grain might be fine up to this stage it could be easily spoiled in the working. Butter should be salted to suit the customers they were supplying.

Mr. Tilley now gave an object lesson with butter in the granular form. The ladies forming the larger part of the audience, manifested special interest by tasting and examining the butter at this stage of its manufacture. The speaker was kept busy answering questions and his explicit answers gave entire satisfaction. The butter was then salted and put up in pound prints, enclosed in parchment paper; this covering gave the butter a neat, attractive appearance. Some store butter having been procured the speaker made a comparison with the butter he had manufactured in their presence, pointing out the discrepency between butter made under proper conditions and the other product of milk which he could not call butter. The butter makers, it was to be trusted fully appreciated the difference between their possibilities as butter makers and the present system of putting on the market an inferior article.

Competition had become so keen that nothing but a first class article would receive the highest market price. He thought that the very rudiments of dairy knowledge, the A B C of dairying, which the average farmer does not know, was that any decent cow was capable of producing $30 worth of butter per year, and with a cow producing this quantity of butter the greatest care should be taken in the manufacture. If he could go through the country and paint on the barns that has been so grossly disfigured by Hood's Cures the picture of a handsome cow being milked by a farmer, and represent in the pail that the cow produced $30 worth of cheese and butter annually, it would cure more billous systems than all the Hood's Sarsaparilla that could be taken.

Mr. Taylor, Sec. of the Dairy Association, thought that meetings of this kind were of great benefit to the farmers. He gave the experience of his dairy superintendent while making butter; he said that while the churning process lasted from 15 minutes to 1½ days, he could not prevent the operator from substituting his fingers for a thermometer, but at the next meeting of the travelling dairy he would use all the persuasive powers he could command to bring his buttermaker to the meeting.

After considerable urging Mr. Perry was brought to the platform, and speaking from his own personal experience he corroborated the remarks of the speakers who had preceded him. He had laid aside the old system of farming and replaced it with a system more consistent with our progress as an agricultural county, and he was now trying to produce an article that would meet the demands of our market. He was satisfied that to be successful they must provide just what our customers would pay the largest price for, irrespective of our own personal desires in the matter.

Mr. McCain, M.P.P., made a few brief remarks, touching on the advancement that farming had made during the last few years, and he would join the other speakers in saying that there was still room for improvement; he believed that agricultural societies as well as the Travelling Dairy were filling a long felt want, and that if farmers would meet together and discuss topics of the farm a great benefit would be derived therefrom. We might say that the success of the meeting was largely due to Mr McCain's efforts and this section is fortunate in having a man in their community who devotes so much time to agricultural work.

The meeting was then closed.

Report of Judges on Dairy Products and Fruit, at the Late Woodstock Exhibition.

We the judges of Fruit and Dairy products shown at the Woodstock Exhibition held Oct 7, 8, and 9th., wish to report that the Butter shown was of fair quality, but only a few samples could be scored as finest. We found that in the majority of cases, the flavor was not what it should have been, caused by improper feeding, unintelligent preparation of Cream, and insufficient washing. The grain in some cases was fine, while other samples showed the effects of over working. Some lots that were of good flavor had to be scored down for salting, the salt not having been thoroughly incorporated into the butter.

Most of the small packages were very tastefully made up, but the crocks and tubs were generally scored down for markings on the tops, *a smooth surface is required.* Particular mention may be made of a basket of prints which took second prize, it plainly showed that the maker was manufacturing an article that package would sell, although the flavor was not just right in this sample. We think that while great improvement has been made in the manufacturing of butter during the last few years. There is still room for improvement in order that a more uniform article can be placed on the market.

The samples of Cheese shown were of a very limited number, but they were very good specimens of the article that is required on the other side of the Atlantic.

The exhibit of fruit clearly showed that this County is capable of producing as fine an article as any county in the Maritime Provinces, though probably not as large a variety. The Judges found it difficult to decide which were deserving of merit, but were governed more particularly by the specimens commanding the highest price in the market.

W. S. TOMPKINS,
J. F. TILLEY.

Why Some People Fail.

The world is full of people who have failed because of Dyspepsia, Biliousness and Constipation, which are responsible for nine-tenths of life's miseries. Burdock Blood Bitters cures these diseases as well as all other diseases of the stomach, liver, bowels and blood in 99 cases out of 100.

A despatch from Smyrna says Capt. John Marriott, of the Norfolk regiment of England, has been captured by brigands while hunting. They demand $50,000 ransom for his release.

Catarrh Cured,

Health and Sweet Breath secured, by Shiloh's Catarrh Remedy. Price 50 cents. Nasal Injector Free. Sold by Garden Bros.

Sarsaparilla Sense.

Any sarsaparilla is sarsaparilla. True. So any tea is tea. So any flour is flour. But grades differ. *You want the best.* It's so with sarsaparilla. There are grades. You want the best. If you understood sarsaparilla as well as you do tea and flour it would be easy to determine. But you don't. How should you? When you are going to buy a commodity whose value you don't know, you pick out an old established house to trade with, and trust their experience and reputation. Do so when buying sarsaparilla.

Ayer's Sarsaparilla has been on the market 50 years. Your grandfather used Ayer's. It is a reputable medicine. *There are many Sarsaparillas—but only one Ayer's.* It cures.

Minard's Liniment Cures Diphtheria.

Hon. Fred. Peters, Premier of P. E. I., recently took out his commission as a Queens Counsel. Thereat the *Mail and Empire* attacks Sir Oliver Mowat for disregarding the policy not to appoint any more Q. C.'s until the question of jurisdiction is settled. Thereby hangs a joke. Mr. Peter's was gazetted Q. C. in June, '94, appointed by Sir John Thompson, but did not pay the requisite fee and take out his commission until a week or two ago.

A MESSAGE TO MEN,
Proving that True Honesty and True Philanthropy Still Exist.

If any man, who is weak, nervous and debilitated, or who is suffering from any of the various troubles resulting from youthful folly, excesses or overwork, will take heart and write to me, I will send him confidentially and *free of charge* the plan pursued by which I was completely restored to perfect health and manhood, after years of suffering from Nervous Debility, Loss of Vigor and Organic Weakness.

I have nothing to sell and, therefore, want no money, but, as I know through my own experience how to sympathize with such sufferers, I am glad to be able to assist any fellow being to a cure. I am well aware of the prevalence of quackery, for I myself was deceived and imposed upon until I nearly lost faith in mankind, but I rejoice to say that I am now perfectly well and happy once more and am desirous therefore to make this certain means of cure known to all. If you will write to me you can rely upon being cured and the proud satisfaction of having been of great service to one in need, will be sufficient reward for my trouble. Absolute secrecy assured. Send 5c. silver to cover postage and address: MR GEORGE G STRONG, North Rockwood, Mich.

A Chicago newspaper states that, at the recent local Democratic convention in that city, of the whole number of delegates, 723, 84 had served terms in jail, 36 have served terms in penitentiary for burglary, 17 have been on trial for murder, 11 are ex-prize fighters, 7 have served sentences for murder and manslaughter, the same number are keepers of gambling houses, 3 have been convicted of mayhem, 2 are keepers of houses of ill-repute, 2 served terms in the penitentiary for picking pockets and one has done time for arson. Of the remainder 265 are saloon keepers. We should doubt the accuracy of this analysis.

Big ads. are needed to boom bad medicines. **Manley's** Celery-Nerve Compound has merit alone to commend it.

Dear Sirs: I cannot praise Manley's Celery-Nerve Compound too highly, and I think its tonic and restorative qualities cannot be surpassed. I was feeling poorly for some time through overwork and before I had taken one bottle of your medicine, I felt completely better. Yours truly,
247 Yonge St., Toronto. E. McNabb.

Milking Test.

Following are the results of the milking test, at the late Exhibition, in competition for the special prize offered by J F Tilley:—

SCALE OF POINTS FOR MILKING TEST.

1 point for each pound of milk;
20 do do do Fat;
4 do do do Solids not fat;
1 do do do Ten days in milk, after the first 20 days (limit 200 days).

10 points are deducted from the total score for each per cent of fat below three per cent in the milk.

THE COWS.

O L S Raymond's Grade Jersey Cow:—

Number of days in milking,	90
Pounds of milk in 1 day,	30 97
Average per cent of fat,	5.3
Total pounds of fat in 1 day,	1.63
Average per cent of solids not fat,	10.4
Total pounds of solids not fat in one day,	3.21
Points for milk,	30.9
do fat,	32 6.
do solids not fat,	12 8
do day's milking,	7
Total score;	82 3

O E Plummer, Waterville, Holstein:—

Number of days milking,	150
Pounds of milk 1 day,	24.3
Average per cent of fat,	4
Total pounds of fat 1 day,	.97
Average per cent of solids not fat,	9
T'l lbs of solids not fat in —days,	2 18
Points for milk,	24.3
do fat,	19.4
do solids not fat,	8.78
do days milking,	13
Total score,	65.48

Fred Eetey, Jacksonville, Red and Spot Ayrshire.

	Red.	Spot.
Number of days milking,	150	100
Pounds of milk 1 day,	17.6	13.12
Average per cent of fat,	4.5	4 3
Total pounds of fat in 1 day,	.79	.56
Average per cent solids not fat,	9 32	9.3
T'l lbs solids not fat 1 day,	1 64	1.22
Points for milk,	17.6	13 12
do fat,	15.80	11.2
do solids not fat,	6.56	4.88
do days milking,	13	8
Total score,	52 96	37.20

William Kearney, Rosedale, Lina and Spot Grade Jerseys:—

	Lina.	Spot.
Number of days milking,	150	100
Pounds of milk in —days,	16 13	10.10
Average per cent of fat,	4.7	5
T'l lbs of fat in —days,	.76	.50
Average per cent solids not fat,	9.4	9.1
T'l lbs solids not fat in—days,	1.51	.91
Points for milking,	16.13	10.10
do fat,	15.20	10
do solids not fat,	6	3.64
do days milking,	13	8
Total score,	50 33	31.74

10c Cures Constipation and Liver Ills.
Dr. Agnew's Liver Pills are the most perfect made, and cure, like magic, Sick Headache, Constipation, Biliousness, Indigestion and all Liver Ills. 10 cents a vial—40 doses.
Sold by Garden Bros.

A Testimony.

Dr. Twitchell, in the *Maine Farmer* gives his impressions of New Brunswick as a farming country and notes with satisfaction its facilities and progress.

Referring to our Exhibition here, and that of Centreville, he writes:—

The Carleton Co. Fair is one of the best three days exhibitions in the whole Province, well officered, well organized, with efficient men in charge of every department. Secretary Watts has proved himself a most valuable officer, holding the position for years. The same is true of President C. L. S. Raymond.

Starting promptly, in spite of dull weather, the programme was carried forward without delay. The show of farm products was immense, basket after basket of potatoes spread out on the one side of the large tent, while on the opposite were the barrels of turnips. Such Ruta Bagas we have never seen, some weighing twenty-six pounds and more, of good quality throughout, and just the thing for the cattle. With a yield of twenty tons per acre, the crop this year must be enormous. The show of other vegetables, save beans, oats and buckwheat was not large, but the quality was excellent throughout.

In the horse classes one found many good specimens tracing to Harry Wilkes, Lumps, Harbinger and other well known trotting bred stallions, also those representing the larger type, and here the colts by Knight of Chester showed to great advantage. In the carriage class line, nine good road horses appeared, a class hard to excel at a county fair.

The sheep show was large, the Shropshires leading, with the Southdowns a good second, well built, blocky, good sized sheep and lambs, a credit to the farmers producing them.

Out among the cattle, good individuals were found, but they were out numbered by the grade bulls and general purpose cows lacking individuality. A few choice Ayrshires and some grand Jerseys were the exception. One yearling heifer would make a Maine butter maker's mouth water and eyes moisten, so well shaped and promising was she. The bulls of this breed were all good in type and promising in desired points, while their calves gave evidence of developing into superior animals.

The poultry show carried a few good birds like the Leghorns, Minorcas, Plymouth Rocks and Toulouse geese, but as a whole did not indicate any fair appreciation of the value of the industry to the farmers of New Brunswick. Some day somebody will wake to find that the dollars have slipped through their fingers as the hens have been neglected.

The exhibit of dairy products was far and away ahead of the last exhibition we visited at Woodstock, and while not attractively displayed was good in quality. Evidently the work of the Farmers' Association and especially the Traveling dairy, is bearing fruit in this county. At Centreville, near Bridgewater, and at Woodstock the good results of dairy instruction could easily be seen. A one day's exhibition was held at Centreville, where, in crowded quarters, a very excellent display was made, extra good butter shown, some of the best horses brought out we have seen during the year, and a large number of cows of the same general type, or want of type, as are found elsewhere. It was a good local exhibition, but lost its object lesson influence by reason of the short time given.

THERE IS NO ROOM
In Canada Large Enough to Hold the People Who Have Been
CURED OF RHEUMATISM
By Ryckman's Kootenay Cure the King of Medicine.

One of Many Testimonials.

Mr. R J. Logan, of St. John, N.B., writes us that he had Rheumatism for 15 years, and, during that time, used barrels of liniments and spent many dollars without getting cured; that the pain was so severe at times in his shoulders that he walked the floor all night. He took two bottles of Ryckman's Kootenay Cure and was completely restored to health. He says that life, at the present time, is worth living, owing to Kootenay Cure, and he recommends the medicine to all Rheumatic sufferers.

Baird Co., Ltd., wholesale agents, For sale by O. A. McKeen.

The trade returns for the month of September show imports of $11,330,000, compared with $9,843,000 in September of last year; an increase of $1,487,000. The duty collected amounted to $1,810,000, as against $1,817,000 last year. The exports for the month were valued at $12,626,000, compared with $10,497,000 in the same month last year. In the imports the item of $1,637,000 is included for coin and bullion and in the exports the same item represents $734,000.

The aborigines of Australia tie the hands of the corpse and pull out the fingernails—this for fear that the dead will scratch their way out of the grave and become vampires.

The drought continues with no sign of abatement and the crop situation in India is daily becoming more serious.

Heavy snow storms are reported in the north of England and Scotland.
