THE QUESTION IS

What kind of an Overcoat, and how much for it? Leave it to your tailor, and he says from \$18 to \$30. Leave it to us, and we say from \$2.99 to \$14.50. And all the difference in the world will be in dollars. Not a bit in quality. Not a bit in style. Not a bit in the beauty of it.

Our Overcoats are proper in style—superior in making—reliable in material—and remarkably low, and absolutely unapproachable in price. When you get an Overcoat here you know just how it is going to look and absolutely unapproachable in price. here you know just how it is going to look and feel before you leave the store, and the service we guarantee, with your money back if you are not satisfied.

Moffatt, who does not know of his years of suffering and who has not heard of his release from a life of helplessness and pain through the medium of Dr. Williams' Pink Pills. Indeed we doubt if in the annals of medicine there is a more remarkable restoration than has been accomplished in Mr. Moffstr's case, and he deems it his duty to mankind to make the facts known through the columns of the

Ten years ago Mr. Moffatt was working in the Newmarket Hat Factory. Through the influence of the damp room, and possibly some carelessness in regard to his health, h was attacked with a severe cold which eventually settled in his limbs. For some years he was an almost constant sufferer from rheumatic pains and spent much money in treatment for the trouble, but with no result beyond an occasional temporary release from pain. Finally to make matters worse he was attacked with malaria and rheumatic fever. He was then forced to go to the Toronto gen

Six weeks later a second operation was performed. The operations proved successful only in so far as they afforded temporary relief. He remained in the hopital from November, 1890, till January, 1892, and with all the modern remedies and appliances known to the staff of that well equipped institution no permanent relief could be contained. He was then advised to go home, stitution no permanent relief could be obtained. He was then advised to go home, partly in the hope that the change might prove beneficial, but instead he continually grew worse, and in March, 1892, was again forced to take to his bed, and those who knew of his condition did not believe he had long to live. At this time every joint in his body was swollen and distorted, and he suffered the most excruciating agony. If a person walked across his bedroom it intensified the pain as though he was being pierced and torn with knives, and if touched he would screem aloud with agony. In this state of

He was still so weak, however, that he was only able to rem in up a few minutes as before. When taken back to bed he felt QUESTIONS OF
LIFE and DEATH.

Here is Your Chance

For a Bargain!

See before. When taken back to bed he felt a sudden tingling seneation going up from his toes and through his joints and spine. The next morning when he awoke the pain had left the body and lodged in the arms, and then for some weeks the pain flitted from place to place in the arms and then disappeared, and he has not had a particle of pain since. All this time he was taking Dr. Williams' Pink Pills and slowly but surely regaining his strength. Then an invalid's chair was procured, and he was wheeled ou to eventually he was able to wheel himself eventually he was able to wheel himself

eventually he was able to wheel himself about. The continued use of the Pink Pills constantly added to his strength, and then the chair was discarded for crytcher, and then the crutches for a cane. At this time (Sept., 1895,) Mr. Meffatt had so far recovered that he was a frequent contributor to the columns of the Advertiser and procuring a horse and buggy he was engaged as local reporter for the paper. The once utterly helpless invalid is now able to go about, and to get in and out of his buggy without any assistance, and is at his post of duty whenever called upon.

ever called upon.

Thus we find that after years of suffering and helplessness Dr. Williams' Pink Pills dies and the best of medical treatment had proved successful after all other reme utterly failed. With such marvellous cures as this to its credit it is no wonder that Dr. Williams' Pink Pills is the most popular medicine with all classes throughout the land, and this case certainly justifies the claim put forth on its behalf that it "cures when other

medicines fail." Tobique Lumber Cut.

Electrical.

It is really wonderful the development which has been made the past few years regard to electricity. As to the possibilities of the future a wide field for speculation is opened. Among the recent notable applications of this strange force we have the fol-

with powar—electrical enery—brought from the falls of Niagara, which are twenty-six miles away. The estimate of the capacity of the Canadian falls alone is 16,800,000 horse power. The Toronto Globe, specula ting upon what has been so far accomplish ed, says that "it is not too much to suppose the possibility that with the marvellous ad vence of electrical science, the power of Niagara will ultimately turn every factory wheel, operate every transportation line, light every city and heat every dwelling within hundreds of miles of the falls." Inasmuch as all the power used in Toronto for street cars, electric lighting, pumping of wa-ter and operation of factories is a little over 16,000 horse power, the above speculation does not seem a bit fanciful. Although five years ago Mr. Edison expressed the opinion that in the then condition of long-distance transmission appliances it would be cheaper to generate electricity by steam than to at-tempt to convey electrical power from Niag-ara, it is now a fact that Fresno has a long-

n their Uppers

A good Shoe differs from its wearer in that it should always be properly "on its uppers." How it gets there, has everything to do with the comfort it brings to the foot. Putting soles on their uppers is hardly a spiritual

work, but it's the big end of Shoe making. There are three ways of doing it-by the use of pegs, Mackay stitching, and the Goodyear welt or hand sewn process (Slater method).

Pegged or Mackay stitched shoes are known from the other make by their putting welts on the sole of the foot instead of having them put on the sole of the shoe. They do this, because the pegs, or stitching, go clear through

the sole, under the foot, where the full weight of the body, pressing upon the surrounding leather, raises hard lumps around every peg or stitch, and these in turn raise painful callosities, and corny spots The soles of the Slater Shoes, are sewn to the welt (or strip of leather which projects beyond the sides of the shoe), away from

the foot, leaving a smooth and pliant surface under the foot while retaining all the elasticity and springiness of the sole leather. This is the Goodyear welted or hand made method, and these "best in the land" shoes are stamped on the soles at
