

W. C. T. U. Corner.

The meeting of the W. C. T. U. is held in GRAHAM'S HALL, each THURSDAY afternoon, at three o'clock. All ladies are cordially invited to attend.

**OUR MOTTO.**  
If God be for us, who can be against us.  
**OUR PERSUASION.**  
That temperance is the moderate use of all things helpful, and total abstinence from all things harmful.  
**OUR FAITH.**  
That as God lives, right the day shall win.

Boys Take Warning.

Joshua Behring, who won a free scholarship in the Cornell Medical College three years ago and has been a student there since, was taken to Bellevue Hospital, the other day, suffering from paralytic dementia, which the doctors attribute to excessive cigarette smoking. Behring is 28 years old. He was educated in Russia and lived here with his uncle, August S. Schomer, who writes most of the plays produced in the Hebrew theatres on the Bowery. Young Behring, his uncle says, has lately smoked ten packages of cigarettes a day. About a month ago he told one of his fellow students that he was tired of cutting up corpses, and said he knew that two men in the dissecting room were not dead when they were brought in. One of them had spoken to him while being dissected, he said. The students laughed at Behring and told him to stop cigarette smoking.

On the next day the young man acted so strangely that he was sent to Bellevue, where the doctors said he was temporarily insane. Two days later he was discharged as cured. He went back to the medical school and got along nicely until Saturday last. On that day he went to 189 Henry street, where he had hired a room, and announced that he was going back to Russia that afternoon. He started out but turned up the next morning and explained that he had been locked up in the Madison street police station for six hours, his cousin having taken him there for safe keeping.

Next morning Behring awakened the other tenants by singing and shouting. Two policemen forced the door of his room and found him dancing on the bed and pulling his hat to pieces. He had already torn his trousers in shreds. He is again in the insane pavilion at Bellevue.

Lord Peel and Temperance Reform.

Lord Peel was the central figure at two public gatherings, held on the 26th ult., in Edinburgh, in support of the proposals for temperance legislation with which his lordship's name has become identified. Speaking at a convention in the afternoon, Lord Peel explained the bearings of his scheme, as embodying a substantial measure of temperance reform, and answering objections which were urged against it. In particular he explained the operation of the time limit, after the expiry of which no compensation whatever would be admissible, and sought to show how by the reduction of licenses meantime effected, and by the general situation created, the way would be paved to a clean slate, on which the nation could write any form of control it chose. Resolutions were subsequently adopted in favor of the Peel report. At the evening meeting over which Lord Aberdeen presided, Lord Peel spoke mainly on the general question of the evils of intemperance, and of the remedy for them that, in his opinion, his scheme offered.

The Chemical Production of Life.

Professor Haeckel was talking recently on the probable future of chemistry, when the conversation drifted on to the often dreamed-of possibility of men being able to produce a living substance by artificial processes; in other words, to make life. Haeckel expressed his belief that some day this will be done; that it is not at all beyond the range of science, strange and improbable as it may seem. "It is only what those plants are doing all the time," he said, pointing to the beautiful green foliage of the garden, "taking so many parts of carbon, hydrogen, nitrogen, oxygen, and so on, and combining them into the albuminous substance which we call protoplasm, the living substance. Science can combine these elements just as nature does, the proportions being exactly known, but she cannot produce life. The albumen molecule is complicated. Science does not know yet just the manner in which the various atoms of carbon, oxygen and so on which compose it are united, and all attempts to solve the problem of the albumen molecule, what it really is and how the elements are joined in it, have been so far without avail. But I believe firmly that this great question will some day be solved. If it be, then the artificial production of life will be a proximate possibility.

**Shoe Style.**  
When you wear a "King Quality" shoe you get all the style, the fit and finish found in the best American shoes.  
The "King Quality" factory is the only one in Canada that makes Ladies' Shoes better than the American article, which comes into Canada with a 25% duty taken out of its quality.  
The "King Quality" brand is worn by the best dressed Canadian ladies; it is a true note of shoe fashion, of correctness in dress, 27 styles, 4 widths, all sizes.  
Branded "King Quality."  
Gold medal awarded at the Paris Exposition, 1900.  
Made by The J. D. King Co. Limited, Toronto.  
Bailey Bros., Local Agents.

There are fewer than 20,000 British soldiers in India, or about one white soldier to every 3,500 natives.

**Stop the Pain but Destroy the Stomach.**—This is sadly too often the case. So many noxious nostrums purporting to cure, in the end do the patient immensely more harm than good. Dr. Von Stan's Pineapple Tablets are a purely vegetable preparation, as harmless as milk. One after eating prevents any disorder of the digestive organs, 60 in a box, 35 cents.—40

Sold by Garden Bros.  
Le Siecle, the leading Dreyfusite organ in France, and the most persistent champion of Great Britain in the matter of the Transvaal, announces its own failure and sale by auction.

**Running Sores,** the outcome of neglect, or bad blood, have a never-failing balm in Dr. Agnew's Ointment. Will heal the most stubborn cases. Soothes irritation almost instantly after first application. It relieves all itching and burning skin diseases in a day. It cures piles in 3 to 5 nights. 35 cents.—39

Sold by Garden Bros.  
Robert M. McWade, United States Consul at Canton, China, reports that 10,000 deaths from the plague have occurred there during the past six weeks.

**Kidney Cry.**—Pain in the back is the cry of the kidneys for help. To neglect the call is to deliver the body over to a disease cruel, ruthless, and finally life destroying. South American Kidney Cure has power akin to miracles in helping the needy kidneys out of the mire of disease. It relieves in six hours.—38

Sold by Garden Bros.  
The annual drink bill of the United States is now over a thousand million dollars in actual consumption.

**Jealous Rivals** cannot turn back the tide. The demand for Dr. Agnew's Little Pills is a marvel. Cheap to buy, but diamonds in quality—banish nausea, coated tongue, water brash, pain after eating, sick headache, never gripe, operate pleasantly. 10 cents.—37

Sold by Garden Bros.  
There are thirty murders a day in the United States, year in and year out, or considerably more than one to the hour.

**"One Foot in the Grave,"**—If the thousands of people who rush to so worthy a remedy as South American Nervine as a last resort would get it as a first resort, how much misery and suffering would be spared. If you have any nerve disorder you needn't suffer a minute longer. A thousand testimonies to prove it.—35

Sold by Garden Bros.  
**Strong words by a New York Specialist.**—"After years of testing and comparison I have no hesitation in saying that Dr. Agnew's Cure for the Heart is the quickest, safest, and surest known to medical science. I use it in my own practice. It relieves the most acute forms of heart ailment inside of thirty minutes and never fails."—35

Sold by Garden Bros.  
The total trade of the British Empire exceeded 1200 million sterling in 1899.

**Deafness of 12 Years' Standing.**—Protracted Catarrh produces deafness in many cases. Capt. Ben. Connor, of Toronto, Canada, was deaf for 12 years from Catarrh. All treatments failed to relieve. Dr. Agnew's Catarrhal Powder gave him relief in one day, and in a very short while the deafness left him entirely. It will do as much for you. 50 cents.—33

Sold by Garden Bros.  
During the last century 400 lives, \$25,000,000 and 200 ships have been lost in fruitless efforts to find the North Pole.

**Sciatica put him on Crutches.**—Jas. Smith, dairyman, of Grimsby, Ont., writes: "My limbs were almost useless from sciatica and rheumatism, and, notwithstanding my esteem for physicians, I must give the credit where it belongs. I am a cured man to-day, and South American Rheumatic Cure must have all the credit. It's a marvel."—34

Sold by Garden Bros.

Agricultural.

Mixed Hog Breeds.

The Kansas experiment station tested the feeding of some pure bred Poland-China and Berkshire hogs along with some hogs of mixed breeds, such as are kept by the average farmer, and they found it required from 10 to 30 per cent more of food to make 100 pounds of gain on the pure bred.

While some of the mixed breeds would stand heavy feeding and give good returns for their food, there were some good in the hind quarters, but too low in front and with weak heart action. They would not stand heavy feeding, got off their feed easily, did not have strong constitutions and easily succumbed to disease. Others were short, fine boned, blocky chunks that fattened quickly, but would not eat enough to make a profitable gain. Those that made the best gains were well boned, with both fore and hind quarters well developed, rather rangy, large through the heart and with legs of fair length.

The Farmer's Horse.

The good draft horse is the one for the farmer to raise. There is no comparison between the drafter and the trotter as the farmer's horse. When the farmer can afford to keep trotters as well as drafters, all well and good, but the drafters he must have. The Clydesdale is at home at any kind of work on the farm—plowing or harrowing, seeding or gathering the grain, is quite in his element hauling heavy loads to market, always commands a ready sale, and if he is a few seconds longer in running to town than his trotter brother he gets there all the same. An authority on the subject says:

"It takes a much larger and better horse to be a drafter now than it did some years ago. Good draft horses are all built on the same plan. They have size, width and quality, good constitution, and so on, but they differ marvelously for all that."

"Really high class drafters have a certain amount of range. The little, close to the ground chunk, the Dutchman's horse, so called, is not the horse to make a high class drafter. No one wants a leggy horse but if the depth of rib and flank are right, if width, substance and quality are right, the horse that is far enough off the ground to move himself properly is the one to raise. He will have a prouder, more masculine carriage and set to the head, and his presence will be more impressive than if he approaches the deformed stage in his shortness of limb. Chunks sell to-day from \$85 to \$140, drafters from \$125 to \$260. The draft horse, the upstanding chap, is the one to buy."

How to Manage Manure.

I have great faith in the use of manure. It is the farmer's bank, and is also one of the products of the farm that is woefully neglected and wasted. Farmyard manure contains much of the matter of which the feed is composed from which it is produced, therefore it is suitable for stable, and about three loads were piled out of doors. It was steaming and hot and looked white or grayish when I hauled it. About the same amount, three loads, I took out of the stable where it had accumulated. The horses had been bedded with straw and wasted hay to absorb the urine. The manure was about two inches deep, packed solid and no indication of heating. All was scattered on the application to any crop.

One of the greatest wastes is to clean out the stable and pile loads without mixing in dirt. Fresh manure, as it is generally thrown out of the stable in piles, will soon heat and steam. That means that the ammonia is fast going out of it into the air. I remember several years ago I bought the manure from a lively ground near of a thickness as we could. The result was that the latter proved to be worth fully three times as much as the former. It should be remembered that the former, or what was in piles, was little damaged by rain, which is another waste, to have the strength washed out. Another mistake is to spread manure on land and plow under too deep, and thus leach too deep into the soil. To spread manure on surface and plow under very shallow, then after a few weeks plow deep is one of the best methods. I prefer surface application, spread on plowed ground and harrow the land at once. Damp cloudy weather is better than dry, windy days to handle manure.

The urine of all animals is valuable and should not be mixed with fresh manure as it accumulates, since it causes it to rot without heating and thereby saving a vast amount of ammonia. If you have not enough bedding or fresh manure to absorb the urine, sprinkle dry dirt or sand to absorb all the moisture. If manure has not been properly fermented or rotted where put in heaps, earth should be mixed in with it and it should also be covered with earth to prevent heating and burning and thus save the loss of ammonia. In a pile where there is heat and air the nitrogen is wasting. Where the manure is packed solid there is no air and no waste. Well rotted manure or scrapings from the lot mixed with dirt will not heat and should be piled as it accumulates and thus saved from evaporation by sun and wind.—Jacob Faith in St. Louis Jo. Ag.

MR. ONESIME GOSSELIN,

OF ST. JOSEPH DeLEVIS,  
CURED BY

"MORIN'S WINE CRESO-PHATES"

Cold and Pleurisy Cannot Resist the Powerful Action of this Incomparable Remedy.

Mr. ONESIME GOSSELIN of SAINT JOSEPH DE LEVIS, thus relates his sufferings and his gladness:—  
I was attacked by Cold and Pleurisy which caused me to suffer horribly. I could get no rest. I was daily growing weaker. I made the acquaintance one day of a person, who advised me specially to try "MORIN'S WINE CRESO-PHATES." I sent for a bottle and began at once to use it. The first dose produced a good effect. This gave me so much confidence in this powerful tonic that I continued to courageously take it according to the directions given in the circulars. After using it for several days, I felt myself a new man. My cough had gone. The Cold and Pleurisy had disappeared as if by magic.

My strength which I had long lost, returned gradually. My appetite was good and my sleep restorative. The family were happy to see me so well.  
My friends visited me every day and each expressed pleasure at seeing me and so strengthened and joyous after such an illness.

I continued for a few weeks more to use this incomparable remedy, and, being eventually restored, I resumed my daily work full of courage, energy and strength.

See always that you get "MORIN'S WINE CRESO-PHATES."

FOR SALE EVERYWHERE.

Attention, Breeders!

If you want to Breed for Speed, breed to RED GLEN

For his colts trot when young, and for road purposes are excelled by none. Lady Glen, 219, holds the championship of the Maritime Provinces as a four and five year old; also the championship of Aroostook County of 219. She won every race she started in last season but one, and got second in that. She has trotted a mile better than 211; has paced a quarter in 30 seconds flat, a two minute clip. There is there another one in this County that can do it. She is the most level-headed pacer on top of the turf. She has never made but one break in all of her races, and that was caused by accidental means. Gentlemen, I want you to understand that RED GLEN is the best bred Pacing Stallion that stands in this County. In the first place his sire is the greatest sire in the Wilkes family, being Red Wilkes, a colt of her race, and that was caused by accidental means. I know of a colt out of a John Bright mare that can beat 2:30 this season if reports are true. RED GLEN is just as well bred on his dam's side as Lamps is the sire of Echo 215. Classmate 217, Banboe trial 2:09, 10 in the 2:30 list, 50 in the 2:30 list. RED GLEN's second dam is Maoria Clay, by Harry Clay 2:29, a son of Cassius M. the dam of Electorator with 163 in 2:30 and the dams of Harrietta 2:09, Bolina 2:08, St. Julian 2:11; of Alonzo 2:27, sire of Maria Wilkes 2:08, Harrietta 2:09; second dam of Alonzo 2:23, sire of Nightingale 2:10, with 133 in 2:30 and better. RED GLEN's fifth dam is by Lexington, sire of the dam of Sunol 2:08, J. L. C. 2:06; Lightning 2:08, Nutwood 2:10, sire of 163 in 2:30 and better, including Manager 2:09; (P). You see on RED GLEN's dam's side, as well as on his sire's side, he carries the blood of the greatest trotting families in the world. Note the sons of Red Wilkes have sired the fastest in the Wilkes family, producing John R. Gentry mile in 1:50, which is the present record. Bert Oliver 2:06, Arlington 2:06, Gentry's Treasure 2:10 as a four-year-old, Sally Toyler 2:03. His daughters have produced Onouka 2:05, Coleceedingly large list of 2:30 performers.

RED GLEN is a horse of very high mettles. No horse living has more nerve force. He is a beautiful bay, carries a head well up, good strong limbs, good feet, a very fast walker, a his sire's side, he carries the blood of the greatest trotting families in the world. Note the sons of Red Wilkes have sired the fastest in the Wilkes family, producing John R. Gentry mile in 1:50, which is the present record. Bert Oliver 2:06, Arlington 2:06, Gentry's Treasure 2:10 as a four-year-old, Sally Toyler 2:03. His daughters have produced Onouka 2:05, Coleceedingly large list of 2:30 performers.

General News Items.

Forty-seven thousand one hundred and seven emigrants left Ireland in 1900.

Minard's Liniment Cures Colds, etc.  
Statistics agree that the population of the world averages 100 women to every 100 men.

Pimples, blotches and all other spring troubles are cured by Hood's Sarsaparilla—the most effective of all spring medicines.

Denmark has passed a law securing medical attendance for drunken persons at the expense of the publican who supplied the last drink.

How to obtain a Rich Color  
By the use of Dr. Ed. Morin's CARDINAL PILLS.

Since 1896, 1,071 new post offices were opened in Canada. Of this total 168 were opened in Nova Scotia and 85 in New Brunswick.

To Cure a Cold in One Day  
Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. 25c. E. W. Grove's signature is on each box.

The last statistics of Mexico show that the value of the corn crop was \$142,000,000, while that of the wheat crop was only \$16,000,000.

A Surprise to Everybody.  
The promptness with which Dr. Chase's Kidney-Liver Pills regulate and invigorate the action of the kidneys, liver and bowels, is a surprise to everybody. They are people's favorite cure for kidney disease, liver complaint, indigestion and constipation. The sale of this great prescription is simply enormous. One pill a dose, 25 cents a box, all dealers.

A pleasant way of spending some of the summer months is that adopted by the King of Greece. He turns farmer, and works as hard as if he were a land laborer. He can plough a field, cut and bind corn—in short, keep a farm going from start to finish as though it were his business.

Free to Inventors.  
The experience of C. A. Snow & Co., in obtaining more than 20,000 patents for inventors has enabled them to helpfully answer many questions relating to the protection of intellectual property. This they have done in a pamphlet treating briefly of United States and foreign patents, with cost of same, and how to prepare the same, trade marks, designs, caveats, infringements, decisions in leading patent cases, etc., etc. This pamphlet will be sent free to anyone writing to C. A. Snow & Co., Washington, D. C.

The police reported seven suicides in New York from midnight on the night of the 8th inst., to 6 o'clock the following evening.

Minard's Liniment Cures Diphtheria.

In Philadelphia there is a saloon for each 757 inhabitants; Boston, 702 to each saloon; Pittsburgh, 629 to each saloon; Cincinnati, 543 to each saloon; New York, 317 to each saloon; Toledo, 200 to each saloon, or one saloon for every forty voters.

The total number of Boer prisoners up to the 9th ult., exclusive of those in the Orange River Colony and the Transvaal, was 11,096.

How A Sprain Does Hurt.  
But it isn't the pain alone that is dreaded, just think of the loss of time and wages. Sprains without number have been cured by rubbing Polson's Nerviline well into the pores of the skin surrounding the joint. No matter whether it is a sprained wrist, ankle, knee or back, just try Nerviline on it, and see how quickly it will cure. There is only one liniment that can be depended upon to cure sprains, strains and swellings, and that is Polson's Nerviline. Large bottle 25 cents.

Trade Figures.

The trade figures of the Dominion for nine months ending March 31 last have been issued by the Department of Customs. The aggregate trade of the Dominion increased during that time by \$8,001,095 as compared with the same nine months last year. The aggregate trade this year was \$283,633,000, as against \$275,632,000 for the first nine months of the last fiscal year. The imports were \$132,341,000 as against \$135,659,000 last year, or a decrease of \$3,318,000. During the same period the exports increased from \$139,973,000 to \$151,312,000, making \$11,339,377 of an increase. In the imports for the last year there is \$1,750,000 more accounted for by the way of bullion, and in the exports of last year there is also \$1,200,000 for bullion, which, of course, is not trade; and if added to this year would make the net increase in the aggregate trade about \$16,000,000. The duty for the nine months was \$21,532,340, a decrease of about \$480,000 compared with the nine months last year. There was a slight increase on imports and duty for the month of March last. There was also a slight decrease for the month in the exports.

Wonderful Magazine Growth.

The increased circulation of THE DELINEATOR in the last three months has been phenomenal. It has risen from 500,000 to 650,000. The reason is easy to find, for each number of THE DELINEATOR contains a careful survey of all the subjects that are most interesting to women who keep house, or who want to know the latest fashions and how to make dresses for themselves in similar styles. From the leading ladies in the land at Washington down to the humblest homes, THE DELINEATOR is a welcome magazine.
